9.1 SLUM /AREA LAYOUT PLAN (FOOT PRINTS OF PROPOSED HOUSES AND INFRASTRUCTURE CONNECTIVITY).....	168
9.2 Onsite Infrastructure service plan (Roads, drainage, etc) and linkage with city wide infrastructure.	168
9.3 Architectural and structural drawings of buildings	168
9.4 L- section /Cross section / Elevation as applicable for road, Drains, Sewers, Water supply , Boundary wall, Retaining wall, Gates etc.....	168
ANNEXURE TO DPR:.....	168

Introductory Note by Chairman

Khirpai Municipality being established in 1876 is an old town with historical importance and dynamic character in growth. And as such we have gone ahead to prepare **Housing for All Details Project Report for the time frame 2015-16** for every family will have a pucca house with water connection, toilet facilities and electricity supply and access. Housing for All (HFA) mission for urban area will be implemented during 2015-16 and seeks to address the housing requirement of urban poor including slum dwellers through four verticals but under this Municipal jurisdiction basically prior one verticals which is Subsidy for beneficiary Led individual house Construction. The **Housing for All DPR** is the outcome of the series of Demand survey workshops, FGDs, Consultations and meetings. It

has been compiled by the technical persons of Khirpai Municipality which have eventually become the **Housing for All DPR** of Khirpai Municipality. The respected citizens expressed their valuable opinions and views. Again those views have been duly incorporated in the **Housing for All DPR**

I must take the opportunity to acknowledge their endeavours and extend gratitude in all respect and I hope it will guide and encourage the people at large in participating in the efforts of the Govt. Of West Bengal Municipal Affairs Department, SUDA, MED and Citizens including elected representatives of Khirpai Municipality towards achieving to prepare the **Housing for All DPR**.

Working Definitions

Affordable Housing Project:	Housing projects where 35% of the houses are constructed for EWS category
Beneficiary	A beneficiary family will comprise husband, wife and unmarried children. The beneficiary family should not own a pucca house (an all weather dwelling unit) either in his/her name or in the name of any member of his/her family in any part of India.
Carpet Area	Area enclosed within the walls, actual area to lay the carpet. This area does not include the thickness of the inner walls
Central Nodal Agencies	Nodal Agencies identified by Ministry for the purposes of implementation of Credit linked subsidy component of the mission
Economically Weaker Section (EWS):	EWS households are defined as households having an annual income up to Rs. 3,00,000 (Rupees Three Lakhs). States/UTs shall have the flexibility to redefine the annual income criteria as per local conditions in consultation with the Centre.
EWS House	An all weather single unit or a unit in a multi-storeyed super structure having carpet area of upto 30 sq. m. with adequate basic civic services and infrastructure services like toilet, water, electricity etc. States can determine the area of EWS as per their local needs with information to Ministry.
“Floor Area Ratio” (FAR)/FSI	The quotient obtained by dividing the total covered area (plinth area) on all the floors by the area of the plot: $FAR = \frac{\text{Total covered area on all the floors} \times 100}{\text{Plot area}}$ <p>If States/Cities have some variations in this definition, State/City definitions will be accepted under the mission</p>
Implementing Agencies	Implementing agencies are the agencies such as Urban Local Bodies, Development Authorities, Housing Boards etc. which are selected by State Government/SLSMC for implementing Housing for All Mission.
Low Income Group (LIG):	LIG households are defined as households having an annual income between Rs.3,00,001 (Rupees Three Lakhs One) up to Rs.6,00,000 (Rupees Six Lakhs). States/UTs shall have the flexibility to redefine the annual income criteria as per local conditions in consultation with the Centre.
Primary Lending Institutions (PLI)	Scheduled Commercial Banks, Housing Finance Companies, Regional Rural Banks (RRBs), State Cooperative Banks, Urban Cooperative Banks or any other institutions as may be identified by the Ministry
Slum	A compact area of at least 300 populations or about 60-70 households of poorly built congested settlements in unhygienic environment usually with inadequate

	infrastructure and lacking in proper sanitary and drinking water facilities.
State Land Nodal Agencies (SLNAs)	Nodal Agency designated by the State Governments for implementing the Mission
Transfer of Development Rights (TDR)	TDR means making available certain amount of additional built up area in lieu of the area relinquished or surrendered by the owner of the land, so that he can use extra built up area himself in some other land.

Brief Project Details

PREFACE

Pradhan Mantri Awas Yojana (PMAY) aims at Providing Housing for All (HFA) by 2022 when the Nation Complete 75 years of its independence.

The urban homeless persons contribute to the economy of the cities and thus the Nation as cheap labour in the informal sector; yet they live with no shelter or social security. The urban homeless people are not getting service with many challenges like no access to elementary Public Services such as health, education, food, water and sanitation. Pradhan Mantri Awas Yojana (PMAY) also aims at providing a pucca house to every family with water connection, toilet facilities, 24 X 7 electricity supply and access.

The Mission seeks to address the housing requirement of urban poor including slum dwellers through "In Situ" Slum Redevelopment, Affordable Housing through credit linked subsidy, and Affordable Housing in partnership and subsidy for beneficiary led individual house. Under the mission, beneficiaries can take advantage under one component only.

Total beneficiaries of the scheme are 400 nos from 37 nos slum and 23 nos of Non Slum projected for the year 2015-16.

Total cost of the project is **Rs. 1620.00 lakhs** as per relevant department & P.W.D. schedule of rates.

Table-1: Format for Projects under Beneficiary led Construction or Enhancement

1.	Name of the State	:	West Bengal					
2.	Name of the City	:	Khirpai Municipality					
3.	Project Name	:	Housing for All					
4.	Project Code *	:						
5.	State Level Nodal Agency	:	SUDA					
6.	Implementing Agency/ ULB	:	Khirpai Municipality					
7.	Date of approval by State Level Sanctioning and Monitoring Committee (SLSMC)	:						
8.	Project Cost (Rs. in Lakhs)	:	1620.00					
9.	No. of beneficiaries covered in the project	:	Gen	SC	ST	OBC	Minority	Total
			150	177	31	24	18	400
10.	(i) No. of Beneficiaries (New Construction)	:	400					
	(ii) No. of Beneficiaries (Enhancement)	:	Nil					
11.	Whether selected beneficiaries have rightful ownership of the land?	:	Yes					
12.	Whether building Plan for all houses have been approved?	:	Yes					
13.	i) GoI grant required (Rs. 1.5 lakh per eligible Beneficiary) (Rs. In Lakhs)	:	600.00					
	ii) State grant, if any (Rs. In Lakhs)	:	846.00					
	iii) ULB grant, if any (Rs. In Lakhs)	:	74.00					
	iv) Beneficiary Share (Rs. In Lakhs)	:	100.00					
	v) Total (Rs. In Lakhs)	:	1620.00					
14.	Whether technical specification/ design for housing have been ensured as per Indian	:	Yes					

	Standards/NBC/ State norms?		
15.	Whether disaster (earthquake, flood, cyclone, landslide etc.) resistant features have been adopted in concept, design and implementation?	:	Yes
16.	Brief of project, including any other information ULB/State would like to furnish	:	Yes

*State will give code number to each project sanctioned under HFA as 'ABCDEFGHIJK'

(Where, 'AB' is State Code as per census, 'CDEFGH' is City Code as per census, 'IJ' is running number of project of the city and 'K' is project component code i.e. 'K' will be 1 - for In-situ slum redevelopment, 2- for Relocation, 3 - for AHP and 4 - for Beneficiary Led Construction or enhancement)

It is hereby confirmed that State/UT and ULB have checked all the beneficiaries as per guidelines of HFA. It is also submitted that no beneficiary has been selected for more than one benefit under the Mission including Credit Linked Subsidy Scheme (CLSS) component of the Mission.

City Profile and Overview

History

Khirpai a small town in Paschim Midnapur was once quite famous for its handloom, brass metal industry and cultivation of indigo. Probably this helped in according the status of a municipality under British rule in the year 1876. History of this town demands that it also had the status of a port, as mentioned in the old map by Mr. Ronald. The ruins of the old 'neel kuthi' can still be seen here. Khirpai was quite famous in the production of 'muslin' too. It had a market in Kolkata and also in Kuttack in Orissa. The town is the birthplace of Dinamayee Devi – wife of legendary social reformer Shri Iswar Chandra Vidyasagar. But even after 131 years of its coming into existence as a Municipality, Khirpai is still the smallest municipal town in West Bengal, in terms of population, revenue, income generation and development. In the first 100 years the municipality has passed through deprivation from the higher level. There was no government grant for improvement and the revenue of the municipality was very less itself as the source of income was very few. Now a day, Khirpai has started moving on the path of development.

Khirpai Municipality being established in 1876 is an old town with historical importance and dynamic character in growth. Khirpai Municipality, though a small one in geographical areas and population in comparison to many others has already proved its worth and over ridding role in a wide range of urban services to more than 20 thousand citizens. In conformity with the outlines of plans formulated by the authorities, this municipality with the help and active participation of all sections of the people has been able to draw out schemes with their implementations in the desired manner. As such we are now in a position to achieve significant development in water generation, solid waste disposal, road development, garbage disposal as well as drainage management and further expecting to cover the other uncovered spheres of activities towards better services to the citizens but there is no reason to cherish self-contentment and I have no hesitation to admit that a section of our citizens are still living in slums amidst thousands of hazards. They are next to being covered with better shelter and environments.

The area of Khirpai Municipality is 11.65 sq. km. there are 4 Nos of Panchayats adjacent to Khirpai Municipality

Year of Establishment

1876

Administrative Boundaries

The area of Khirpai Municipality is 11.65 sq. km. there are 4 Nos of Panchayats adjacent to Khirpai Municipality.

- 4 No. Manik Kundu Gram Panchayat
- 3 No. Mangrul Gram Panchayat
- Birshingha Gram Panchayat
- 2 No. Manoharpur Gram Panchayat

Linkages of Rail, Road, Port and Air

The town Khirpai is well linked with its district head quarter Medinipur, and also with Kolkata – the state capital, through a broad gauge railway line from Panskura (S.E. railway) as well as through state highway N.H. 6. The nearest railway station to Khirpai is Chandrakona Road. As it is nearer to Kolkata and has close link with it has enough scope of future development activities.

Table-2: Format of Distance from office to Head Quarter

Khirpai to Kolkata	108 km
Khirpai to Midnapur	62 km
Khirpai to Sub division – Ghatal	15 km
Khirpai to nearest police station – Chandrakona	11 km

Economic Activity

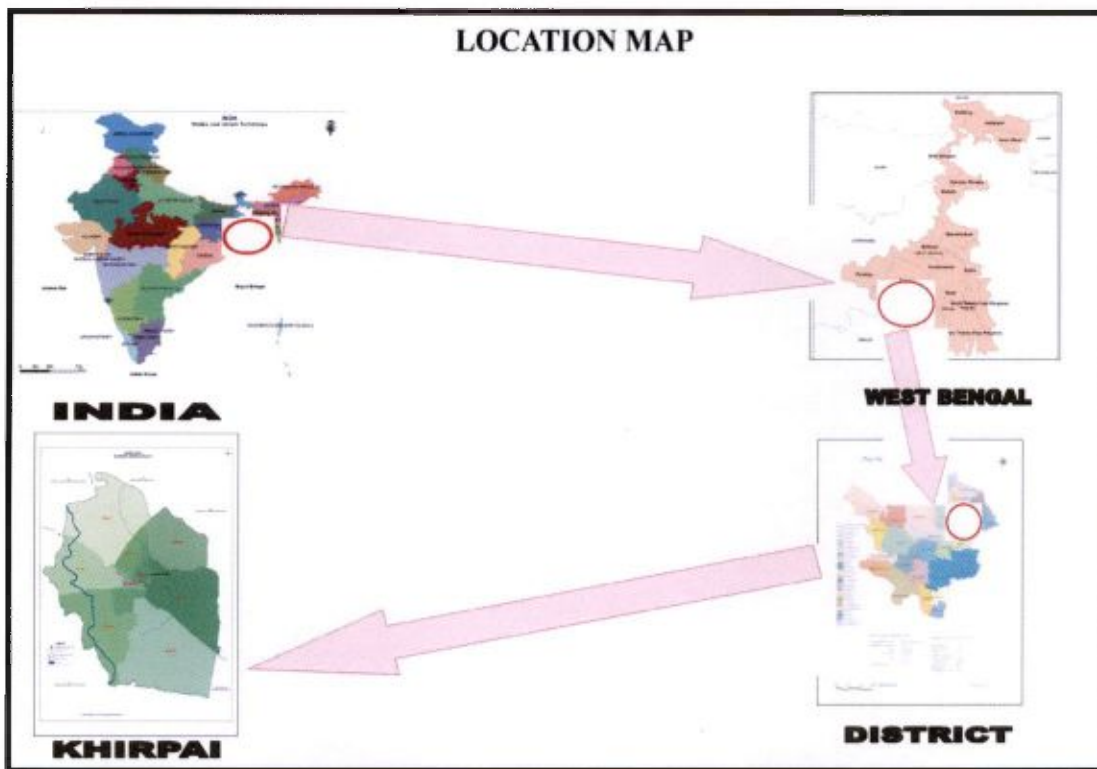

Khirpai Municipality is basically agro-based trade and commercial area.

Table-3: City at a Glance

Sl. No	Indicator	2001	2011	2015
1	Area (in SqKm)			
1.1	Planning Area (Sq. Km)	11.65 sq. km.	11.65 sq. km.	11.65 sq. km.

DEMOGRAPHIC GROWTH AND POPULATION PROJECTION

Khirpai is a small semi rural town. Population is not very high here, neither is the growth rate. The population-projected upto 2021 as presented in the following table depicts this fact.

Table- 4: Population Projection

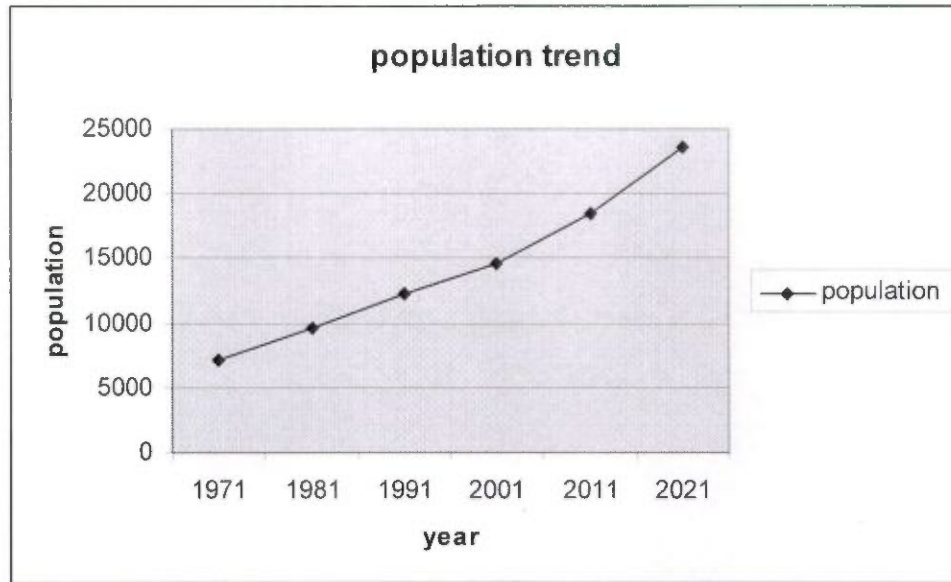

Year	1971	1981	1991	2001	2011	2021
Total population	7075	9552	12199	14545	18518	23578

Source: Census of India and own source

The population trend has been displayed graphically in the following graph. The ward wise population distribution provided below depicts a more or less uniform population with highest in ward 7 and lowest in ward no.10.

Place of interest

Khirpai is not a place for tourist interest. It is a small and old town. Not much historical incidents are attached with this place. Only there are some old temples and heritage sites within municipal area, which attracts local people. There are some terracotta structures, which resemble the famous ones in Bankura. Experts assume these temples to be at least 400 to 500 years old. A list of the temples has been provided below.

Section I: Introduction

“Housing for All” Mission for urban area will be implemented during 2015-2022 and Mission will provide central assistance to implementing agencies through States and UTs for providing houses to all eligible families/beneficiaries by 2022. Mission will be implemented as Centrally Sponsored Scheme (CSS) except for the component 1.2 of credit linked subsidy which will be implemented as a Central Sector Scheme. A beneficiary family will comprise husband, wife, unmarried sons and/or unmarried daughters. The beneficiary family should not own a pucca house either in his/her name or in the name of any member of his/her family in any part of India to be eligible to receive central assistance under the mission. States/UTs, at their discretion, may decide a cut-off date on which beneficiaries need to be resident that urban area for being eligible to take benefits under the scheme.

Mission with all its component has become effective from the date 17.06.2015 and will be implemented up to 31.03.2022. All 4041 statutory towns as per Census 2011 with focus on 500 Class I cities would be covered in three phases as follows:

- Phase I (April 2015 - March 2017) to cover 100 Cities selected from States/UTs as
 - per their willingness.
- Phase II (April 2017 - March 2019) to cover additional 200 Cities•
- Phase III (April 2019 - March 2022) to cover all other remaining Cities•

Ministry, however, will have flexibility regarding inclusion of additional cities in earlier phases in case there is a resource backed demand from States/UTs.

The HFAPoA for Khirpai has been prepared in accordance with the guidelines issued by Ministry of Housing and Urban Poverty Alleviation, Government of India. Overall approach adopted throughout the preparation of this HFAPoA has been based on four key principles,

- well rounded stakeholder consultations,
- continuous community involvement,
- providing innovative solutions and
- Coordination & validation.

Methodology adopted for preparation of HFAPoA is demonstrated in the below:

- 1) Taking Initiative for Demand Assessment Survey.
- 2) Conducting Orientation Programme with elected representative and officers of ULB.
- 3) Conducting Orientation programme with Supervisors and Enumerators.
- 4) Conducting Demand survey and complete the work.
- 5) Conducting Data Entry of the survey form and complete the work
- 6) Analysis of the data.
- 7) Filling up the requisite formats.

- 8) Planning of project with elected representatives and officers of ULB.
- 9) Preparing investment requirement and Financial plan
- 10) Finalization of HFAPoA.

Section: 2 Salient features of HFAPoA and its linkage with proposed project and its justification

2.1 General introduction on status and Prioritization for proposed project

In summarizing the HFAPoA of Khirpai Municipality, Khirpai Municipality takes one for implementation of the project i.e. "Beneficiary -led - construction". For this project, Khirpai Municipality conducted Demand Assessment survey for getting total requirement of houses in the ULB. From this survey, the total survey form received 3551. Total houses will be constructed through "Beneficiary-led-Construction."

2.2. Summary of findings of HFAPoA. Physical infrastructure & Social infrastructure, Spatial, demographic and socio-economic profiles of slums/ Non slums;

Housing for All (HFA) Scheme has since been launched by the Ministry of Housing & Urban Poverty Alleviation (MoHUPA), Govt. of India in Mission mode which envisages provision of Housing for All by 2022 when the Nation completes 75 years of its Independence. The Mission seeks to address the housing requirement of urban poor including slum dwellers through following programme verticals:

- a) Redevelopment of slums with private participation
- b) Promotion of affordable Housing for weaker section through credit linked subsidy
- c) Affordable Housing in partnership with public sectors
- d) Subsidy for beneficiary-led individual house construction.

In compliance with the objective and as per direction of the Ministry of Housing & Urban Poverty Alleviation (MoHUPA) and State Urban Development agency (SUDA), West Bengal was undertaking a demand survey through suitable means for accessing the actual demand of housing. For this mission Khirpai Municipality undertook Demand survey on 18.09.2015 and completed the survey on 30.09.2015. From this survey, different information have been took off. Summary of findings of survey have been given below:

9	0	460	460
10	0	176	176
Total	0	3551	3551

Source: Demand survey, 2015

From the above table, it is noticed that out of total 3551 households falls under the scheme. From that 3551 household require new house construction.

In summarizing the HFAPoA of Khirpai Municipality, Khirpai Municipality takes one vertical for implementation of the project i.e. "Beneficiary -led - construction". For this project, Khirpai Municipality conducted Demand Assessment survey for getting total requirement of houses in the ULB. From this survey, the total survey form received 3551. Out of that form received from 37 slums and 23 Non slum areas. 3551 houses will be constructed through "Beneficiary-led-Construction".

Land use and Land availability

Khirpai municipality is a predominantly a semi rural area undergoing the transition to slowly become an urban area. With a population of 14525 in 2001 spread over an area of 11.65 sq km, the density of Khirpai is 1248.49 people per sq km. This century old municipality has grown haphazardly in the absence of proper town planning knowledge and environment during all these years. However with the introduction of five year planning from the grass root level, the draft development Plan offers an unique opportunity to properly mange and manage ones resources and plan for the future keeping in mind the increasing population and demand for services. Land is one of the most important resources of mankind, which needs to be used judiciously for the benefit of the people without compromising on the environment.

Land use planning means the scientific, aesthetic, and orderly disposition of land, resources, facilities and services with a view to securing the physical, economic and social efficiency, health and well-being of urban and rural communities

1. Municipality will prepare a Land use zoning and will control regulations

2. The municipality will impose banning of obnoxious and hazardous uses of land in residential areas including discontinuation of such existing uses of Land
3. Water bodies will be protected as per the government regulations
4. ULB will take the work of publication of street alignments as per West Bengal Municipal Act within a short period.

Various types of land uses exist in the locality. The salient sectors of land uses are as follows:

- Residential
- Commercial
- Wetland/ lakes / tanks
- Public parks, squares and gardens
- Vacant land
- Roads
- Drainage networks and outfalls
- In-sanitary water courses
- Unauthorised buildings, unfit for human habitation having potentiality of causing danger
- Public building

Housing Typologies

As per Census 2011 the population of Khirpai Municipality is 16384 of which number of persons residing in slums are 10860, which is about 66% of the total population. As per the socio economic survey undertaken as part of preparation of HFAPoA and validated by ULB and community, a total of 3551 households stay in slums. From present Demand Assessment survey for Housing for all (HFA), it is noticed that 400 household covering under this project on 1st year. All houses will be constructed through "Beneficiary-led-Construction". Under "Beneficiary-led-Construction" each beneficiary will get 1.5 lakh from central assistance.

Water

Water supply in Khirpai Municipality is under the Public Health Engineering (PHE) department. The main source of water is ground water. There are 3 deep tubewells with capacity of total 1 lakh gallon per day. In the whole town there are 156 hand tubewells in working condition and 20 are out of order and seek immediate repairing or replacement. Number of household water connection provided is 242.

Since all pumps are located in one ward, some places of other wards suffer from low pressure of water. According to the municipal record ward no. 5 and 6 are the most suffering wards. A brief account of the places suffering from this problem has been provided below.

There is one reservoir with capacity of 454000 liter. Water is supplied in two shifts supply a total volume of 90800 litres per day. According to the Urban Household Survey only 18.59 % of the households have household connection for drinking water while more than 80 % of the population depend on public sources of supply

Solid waste disposal

If solid wastes are not managed properly, there are many negative impacts that may result. Some of the most important are mentioned in the following list. The relative importance of each depends very much on local conditions. The local condition of khirpai municipality shows that solid waste management is in the crude form, which is collection and disposal of garbage. There is no system of door-to-door waste collection in the municipality. The disposal system is dumping along roadside and invested lands and low lying areas. So far there was one dumping ground in the municipality at ward no. 8, but now the municipality has purchased land to develop it as a dumping ground in Bhutadanga paddy field in ward no. 7. Total area of the site is 66 dismal. Also some tractors, trailers, garbage trolley van, handcarts and cycle vans have been purchased for the transportation of the waste.

Open Disposal of Waste

There are total 8 vats all over the municipal area. Those are situated in ward no. 2, 3, 4, 5, 6, 7, and 10. SWM equipments and transportation vehicles available in the municipality are as follows.

It is evident from the municipal record that the solid waste management sector is yet to develop a lot both in terms of physical asset and service delivery. Equipments are less than the requirement. The service delivery also does not satisfy the need.

The result of such practice is as follows -

- Uncollected wastes often end up in drains, causing blockages, which result in flooding and in sanitary conditions.
- Flies breed in some constituents of solid wastes, and flies are very effective vectors that spread disease.
- The open burning of waste causes air pollution; the products of combustion include dioxins, which are particularly hazardous. .
- Waste collection workers face particular occupational hazards, including strains from lifting, injuries from sharp objects and traffic accidents.
- Dumps of waste and abandoned vehicles block streets and other access ways.

Drains

Drainage in Khirpai is mostly Kutcha drains and few pucca drains in certain pockets. The drains are not properly planned though being Kutcha drains they follow the natural drainage. However clogging of drains and overflowing of water remains a major problem. Hence all kutchra drains needs to be converted to puccadrain.

Table-16: Drainage Network

Ward no	Type of drain and length in Km.		
	Kutcha	Pucca	Semi Pucca
1	5.15	0.5	0
2	2.69	0.45	0.1
3	18.25	0	0
4	3.1	0	0
5	2.9	0	0
6	5	0	0
7	10.4	0	0
8	3.29	0	0
9	4.2	0	0
10	4.1	0	0
Total	59.08	0.95	0.1

Source: Municipality

The drainage network is not planned. Almost all the wards have some informal outfall. This unplanned structure of drainage network and outfall creates the problem of water logging especially during the monsoon season. Most of the households and wards have reported in the Household survey to suffer from water logging for less than one day.

Improper drainage system is one of the emerging challenges of Khirpai Municipality, which leads to water logging condition in several slums every year during monsoons. None of 37 slums of Khirpai have connectivity to city wide underground drainage/sewer line. Table below shows the status of connectivity to City-wide Storm-water Drainage System.

Roads

Khirpai municipality is connected with both Kutcha and pucca roads. There are two levels of road found here. Concrete and bituminous roads are found as major roads connecting different wards. While intra ward roads are semi pucca to Kutcha in structure. Municipality records show that that 43.13% of the roads are semi pucca. Most of the roads in Khirpai are semi pucca in structure.

A ward wise feature has been provided in the table below.

Table-17: Road Network

Ward no	Type of roads and length (km)				
	Kutcha	Semi pucca/ WBM	Brick paved	Concrete	Black top
1	0.60	3.85	0.15	0.00	1.50

Project Justification

For the following reasons Khirpai Municipality selected the slums namely mentioned below as first project for preparation of DPR under HFAPoA (PMAY):

Table-20: Justification of the Project

Sl. No	Name of the Slums	Status	Land	Age in years	National Highway	Status of Housings	Road Status	Habitation pattern
1	CHUNARU PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	100	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
2	ADIBASI PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	25	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
3	KUMAR PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	65	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
4	MUSLIM PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	80	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
5	DAS PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	70	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space

Detail Project Report for BLC in Slum and Non-Slum under HFA of Khirpai Municipality for 2015-16 PMAY: Urban

6	KUMARPUKUR PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	50	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
7	GHOSH PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	75	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
8	DAS PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	80	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
9	TELIBAJAR ADIBASI PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	15	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
10	BAG PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	3	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
11	DUTTAPUKUR	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	25	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
12	SHIBBAZAR	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	80	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space

Detail Project Report for BLC in Slum and Non-Slum under HFA of Khirpai Municipality for 2015-16 PMAY: Urban

13	CHALAK PARA & KAPAT PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	75	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
14	ADIBASIPARA & DANGAPARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	85	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
15	RUSKAR PARA & KARKAR PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	85	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
16	KARAK PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	90	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
17	BAMUNPUKUR	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	79	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
18	MUSLIM PARA & ADHIKARI PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	15	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
19	DHALI PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	75	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space

Detail Project Report for BLC in Slum and Non-Slum under HFA of Khirpai Municipality for 2015-16 PMAY: Urban

20	DHARAMPORE MAJHERPARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	25	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
21	DEWAN PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	85	The National Highway - 6 is 40 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
22	HARER DANGA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	15	The National Highway - 6 is 40 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
23	UTTAR PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	18	The National Highway - 6 is 40 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
24	MOSPUKUR ADIBASI PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	90	The National Highway - 6 is 40 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
25	DEWAN PARA & DOM PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	30	The National Highway - 6 is 40 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
26	SHYAMALGANJA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	85	The National Highway - 6 is 40 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space

Detail Project Report for BLC in Slum and Non-Slum under HFA of Khirpai Municipality for 2015-16 PMAY: Urban

27	UTTAR PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	10	The National Highway - 6 is 40 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
28	BAGDI PARA & DHOBA PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	12	The National Highway - 6 is 40 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
29	LAYEK PARA & MOS PUKUR PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	15	The National Highway - 6 is 40 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
30	KABADI PARA & DOGRA DAS PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	90	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
31	SALIM CHAWK	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	80	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
32	BABU PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	80	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
33	BAG PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	80	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminous or damaged roads.	Habitation pattern in the slums is congested with insufficient open space

Detail Project Report for BLC in Slum and Non-Slum under HFA of Khirpai Municipality for 2015-16 PMAY: Urban

34	GOKULGANJA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	80	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
35	SHANKRAPARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	80	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
36	JAMIDAR PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	80	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
37	METE PARA	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	80	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space

For the following reasons Khirpai Municipality selected the Non-slums namely mentioned below as first project for preparation of DPR under HFAPoA (PMAY):

Table-21: Reasons of Non Slum

Sl. No	Name of the Slums	Status	Land	Age in years	National High Way	Status of Housings	Road Status	Habitation pattern	Sl. No
1	MANIKPUR	The condition of living in the slum is unhygienic	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	45	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
2	HATTALA	The condition of living in the slum is unhygienic	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	35	The National Highway - 6 is 42 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
3	CHOWKAN	The condition of living in the slum is unhygienic	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	41	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space
4	HALDERPARA	The condition of living in the slum is unhygienic	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	43	The National Highway - 6 is 41 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space

22	PATRA PARA	The condition of living in the slum is unhygienic	The condition of living in the slum is unhygienic	Land belongs to the Beneficiary	32	The National Highway - 6 is 40 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tiles on roof	Majority portion of roads are CC, Bituminious or damaged roads.	Habitation pattern in the slums is congested with insufficient open space

2.3 Tenure Status

As per the demand survey and geographical location of the city out of four verticals municipality has taken only Beneficiary Lead Construction (BLC) for the year 2015-16. In the 1st year of implementation of Housing for All, 400 beneficiaries have been identified for the construction of New House through BLC. The above beneficiaries have been selected only who have their own land required for the construction of new house under BLC.

Table – 22: Land Tenure Status in connection with Housing for All in Slums

Ward No.	Slum Code	Slum Name	AREA in Sq Mt	Ownership details				Type of house based on Roof

2.4 Choice of Option/Vertical and its justification for housing and/or infrastructure

- “In-situ” Slum Redevelopment using land as Resource(include viability analysis)
- Credit-Linked Subsidy Scheme (CLSS)
- Affordable Housing in Partnership (AHP)
- Beneficiary-led individual house construction or enhancement

In the case of Khirpai Municipality, this Municipality takes only one vertical i.e. “Beneficiary led construction”. From present Demand Assessment survey for Housing for all (HFA), it is noticed that 3551 household covering under this project. 3551 houses will be constructed through “Beneficiary-led-Construction” Under “Beneficiary-led-Construction” each beneficiary will get 1.5 lakh from central assistance.

2.5 Resource mobilization strategy and Implementation strategy

Physical and social infrastructure requires developing in slum and non slum area to be covered other central and state schemes like 13th FC, 4th SFC, and UWES etc. Beneficiaries belong to pro-poor families, unable to contribute the beneficiary contribution under HFA project should be cover under project of SUHP funded by State Government.

Roles and responsibilities of the Institutions:

Central Sanctioning and Monitoring Committee (CSMC)

- An inter-ministerial committee under Chairpersonship of Secretary (HUPA) for implementation of the Mission, approvals there under and monitoring.

Indicative Functions of CSMC

- Overall review and Monitoring of the Mission
- Assessing resource requirement based on HFAPoA and AIP submitted by States/UTs
- Approval of central releases under various components of the Mission
- Approval of Capacity Building Plans of States/UTs
- Devising financial and other norms for various activities undertaken as part of the Mission
- Approval of Annual Quality Monitoring Plans, Social Audit plans etc.
- Any other important issues required for implementation of the Mission.

State Level Sanctioning and Monitoring Committee (SLSMC)

Indicative functions of SLSMC

- Approval of Housing for All Plan of Action (HFAPoA)
- Approval of Annual Implementation Plan
- Approval of DPRs under various components of the Mission
- Approval of Annual Quality Monitoring Plans
- Reviewing progress of approved projects in the State and cities
- Monitoring of implementation of Mission
- Any other issues required for effective implementation of the Mission.

Section 3: Project Concept and Scope

3.1 Introduction of slum(s)/non Slum Area

Under section-3 of the Slum Area Improvement and Clearance Act, 1956, slums have been defined as mainly those residential areas where dwellings are in any respect unfit for human habitation by reasons of dilapidation, overcrowding, faulty arrangements and designs of such buildings, narrowness and faulty arrangement of streets, lack ventilation, light or sanitation facilities or any combination of these factors which are detrimental to safety, health and morals. Thus, conceptually slums are compact overcrowded residential areas (and not isolated or scattered dwellings) unfit for habitation due to lack of one or more of the basic infrastructure like drinking water, sanitation, electricity, sewerage, streets etc.

It is in this background that in the 2001 Census, an innovative attempt was made to collect demographic data slum areas across the country.

As per 2001 population census, the slum population is estimated to be 61.8 million, out of a total urban population of 285.35 million people reside in urban areas. The analysis of the data in this report provided an overview of the population characteristics of slums and squatter settlements and is expected to serve as a benchmark for pragmatic and realistic town planning while dealing with the issue of slums and slum dwellers. Urbanization is fast becoming the defining process in shaping the course of social transformation & ensuing development concerns in India. About 377 million persons or about 31% of India's population of 1.21 billion lived in urban areas in 2011, spread over 5161 towns. As per Report on Indian Urban Infrastructure and Services (NIUA) Report, the urban population is likely to grow to about 600 million by 2031. About one-fourth (24%) of the urban population of India is poor i.e. their expenditure on consumption goods is less than the poverty line benchmark. The benefits of urbanization have eluded this burgeoning 67 million urban poor population, most of who live in slums. An analysis of population growth trends between 1991 and 2001 shows that while India grew at an average annual growth rate of 2%, urban India grew at 3% mega cities at 4% and slum populations rose by 5%. This rapid and unplanned urbanization and simultaneous growth of urban population in the limited living spaces has a visible impact on the quality of life of the slum dwellers of the city. It is increasing clear that sustainable growth can only take place when it is inclusive and when the entire population including the poor and marginalized need to have at the least access to descent shelter, basic amenities, livelihoods and a voice in governance. Keeping this in mind the Government of India and the various State Governments have been taking up several schemes on partnership mode.

Access to Bathroom facility

- In terms of access to bathroom facilities, 21% households (have bathroom facilities inside their own premise, of which around 70% households are from notified slums and rest from non-notified slums.
- Rest of households does not have any bathroom facilities inside their premises, of which 26% use outside facilities and another 8% depend on ponds.

Drains

Improper drainage system is one of the emerging challenges of Khirpai Municipality, which leads to water logging condition in several slums every year during monsoons. None of 31 slums of Khirpai have connectivity to city wide underground drainage/sewer line. Table below shows the status of connectivity to City-wide Storm-water Drainage System.

Roads

Khirpai municipality is connected with both Kutcha and pucca roads. There are two levels of road found here. Concrete and bituminous roads are found as major roads connecting different wards. While intra ward roads are semi pucca to Kutcha in structure. Municipality records show that that 43.13% of the roads are semi pucca. Most of the roads in Khirpai are semi pucca in structure.

A ward wise feature has been provided in the table below.

Table - 33: Road Network

Ward no	Type of roads and length (km)				
	Kutcha	Semi pucca/ WBM	Brick paved	Concrete	Black top
1	0.60	3.85	0.15	0.00	1.50
2	0.50	0.98	0.10	0.23	0.80
3	2.60	6.39	0.50	0.00	2.00
4	0.50	2.75	0.00	0.00	1.00
5	1.08	3.86	0.33	0.00	0.00
6	3.18	7.25	1.65	0.26	0.00

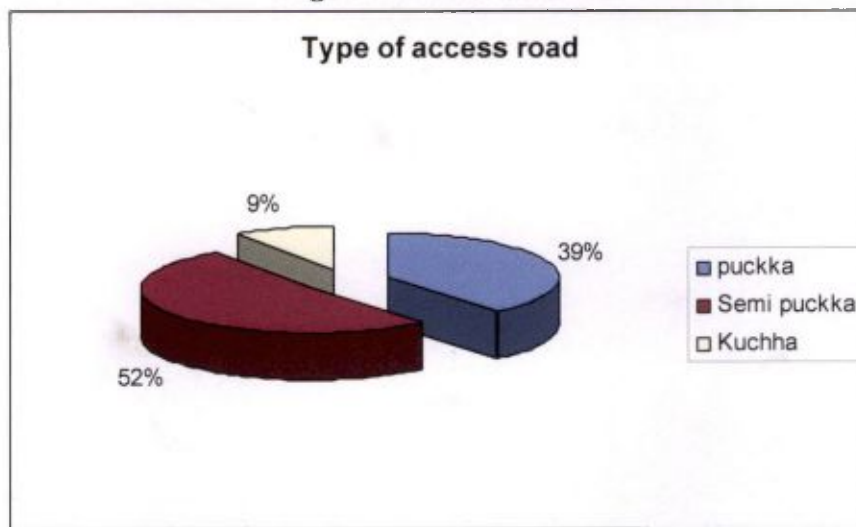

Ward no	Type of roads and length (km)				
	Kutchha	Semi pucca/ WBM	Brick paved	Concrete	Black top
7	0.30	4.65	0.75	0.00	1.75
8	1.00	4.60	0.00	0.35	1.50
9	1.40	7.30	0.00	0.00	0.00
10	0.00	1.50	0.25	0.00	0.75
Total	11.15	43.13	3.73	0.84	9.30

Source: Municipality

As is evident from the above table kutchha roads does not cover any significant part of the road network in the municipality. . Most of the households reported to have access roads as pucca or semi pucca in the urban household survey. Refer MAP 6 Overleaf.

Most of the dwelling units have mud flooring closely followed by cement flooring. Firewood is the major source of cooking fuel in majority of the slum household.

DPR SCRUTINITY REPORT FOR THE PROJECT UNDER BENEFICIARIES LED INDIVIDUAL HOUSE CONSTRUCTION / ENHANCEMENT COMPONENT OF PRADHAN MANTRI AWAS YOJANA (PMAY)

BASIC INFORMATION:					
1	Name of the State	:	West Bengal		
2	Name of the City	:	KHIRPAI		
3	Project Name	:	HFA under PMAY		
4	Project Code	:			
5	State Level Nodal Agency (SLNA)	:	SUDA		
6	Implementing Agency/ ULB	:	Khirpai Municipality		
7			Total	New construction	Enhancement
	i) Project Cost (Rs in Lakhs)	:	1620.00	1620.00	Nil
	ii) GoI grant (Rs. in Lakhs)	:	600.00	600.00	Nil
	iii) State Grant (Rs. in Lakhs)	:	846.00	846.00	Nil
	iv) ULB/ Implementing agency share (Rs. in Lakhs)	:	74.00	Nil	Nil
	v) Beneficiary share (Rs. in Lakhs)	:	100.00	100.00	Nil
	vi) others, if any (Rs. in Lakhs)	:	Nil	Nil	Nil
8	Sources of availability of beneficiary share (self/loan/any other):	:	Self		
			(As per Annexure I)		
9	Project Brief:	:	HFA under PMAY		
10	No of eligible Beneficiaries for GoI grant:	:	400		
11	Project duration (in months):	:	12		
ADMINISTRATIVE DETAILS					
12	Date of State Level Appraisal Committee (SLAC) approval of the project:	:			
13	Whether observations of SLAC have been incorporated?	:	Yes		
14	Date of SLSMC approved the project:	:			
15	Whether the format as per Annexure 7C of PMAY scheme guidelines has been signed by competent authorities:	:	Yes		
LAND DETAILS					
16	Whether selected beneficiaries have rightful ownership of land?	:	Yes		
TECHNICAL DETAILS					
17	No of Proposed houses	:			
	i) New Construction	:	400		
	ii) Enhancement	:	Nil		

18	Whether the carpet area of proposed houses is up to 30 Sqm? If more, whether consultation with the Ministry has been done for determining the size of houses?	:	Within 30 Sqm
19	Whether building plans for all houses have been approved?	:	Yes
20	Schedule of Rates (SOR) adopted (Year)	:	
21	Whether cost index has been taken over the SOR rates? if Yes, whether supporting documents approving the same is furnished.	:	Yes
22	Whether technical specifications/design of housing have been ensured as per Indian Standards/NBC/State norms	:	Yes
23	Whether disaster (earthquake, flood, cyclone, landslide etc.) resistant features have been adopted in concept, design and implementation of the project? Please specify.	:	Yes
24	Whether statutory approvals from competent authorities have been obtained? If required	:	Yes
25	Whether any innovative / cost effective / green technology adopted in the project? If yes, please specify	:	No
26	Whether Beneficiaries have access to basic civic and social infrastructure facilities?	:	Yes
27	How Quality Assurance is proposed to be ensured for beneficiary led construction? Specify	:	Yes

Section 4 – Description of Proposed Project and Planning

4.1 Provision of Housing

The Supply Demand Gap and Requirements

<u>Particulars</u>	<u>Requirements</u>
--------------------	---------------------

Housing: Dwelling Unit provision for Households with standard provisions:

- 1 Multipurpose Room
- 1 Bed Room
- 1 Kitchen
- 1 Toilet
- 1 W.C

Physical Infrastructure Requirement:

Standard Infrastructure Provision for

- Water Supply
- Drainage
- Roads
- Electricity

Project Development Option

In-situ redevelopment and whole of the project will be addressed in the project

Proposed Development

Based on preliminary understanding, the following components are being proposed

- Housing Units [Single storied in situ].
- Standard Physical Infrastructure to be provided in the form of Circulation of Water Supply Drainage, Roads and Electricity

Innovations proposed in Project Planning

Background

Housing activities are known to have the capacity to play a significant role in social-economic development, because they help not only in creation of shelter for the people by also in generating employment opportunities for a large variety skilled and unskilled work force which is a prerequisite for growth and development of settlement. A considerable section of the people without land are in a still worse position as housing schemes for the poor have hither to been targeted on paper but not applied in practice. Both the serviced land and shelter have become beyond the reach for half of the population-hence formation of slums, encroachments, informal colonies and unauthorized

constructions. No land is earmarked for Economically Weaker Sections and Low Income Groups in Master Plan. The population density norms are required to re-look to enable better utilization of valuable land, as certain areas in the city. This growing slum population and the lack of basic facilities like water and sanitation will badly impact on overall development and prosperity of urban centres like Municipality.

To overcome the existing situation and to promote planned development the following innovative strategies can be adopted for the improvement of the city.

- To ensure that housing, along with the supporting services is treated as a priority and at par with the infrastructure sector.
- Forging strong partnerships between private, public, and cooperative sectors to enhance the capacity of the construction industry.
- Organizing public consultations to meet the special needs of slum dwellers.
- Promotion of livelihood for the slum dwellers.

Financial Implementation:

Beneficiary led Participation:

Implies development of housing by involvement of Beneficiary

Tasks:

- Composition of beneficiaries and organizing the area meetings.
- Involvement of community and sustainable livelihood framework (SLF) in decision making and prioritization of needs of the slum.
- understating of Social-economic profile

Post Project Monitoring

A Monitoring & Evaluation team has to be formed to know the post project impact on the slums and to document the best practices.

Physical Infrastructure

Background

The National Sample Survey Organization (NSSO) in the Ministry of Statistics and Programme Implementation, Government of India has released the report of a nation-wide survey carried out by it during July 2008 to June 2009 (65th round) on the condition of urban slums.

The aim of the survey was to collect information on the present condition of the slums and on recent changes, if any, in the condition of facilities available therein. Both 'notified slums' – areas notified as slums by the municipalities, corporations, local bodies or development authorities – and non-notified slums were surveyed – a non-notified slum being any compact urban area with a collection of poorly built tenements, mostly of temporary nature, crowded together usually with inadequate sanitary and drinking water facilities in unhygienic conditions. The present report gives the condition of urban slums, covering ownership, area type, structure, road within and approaching the slum, living facilities like electricity, drinking water, latrine, sewerage, drainage, garbage disposal, and distance of slums from the nearest primary school and government hospital/health centre. It also estimates the proportion of slums where certain specific facilities have improved/ deteriorated over the five years preceding the date of survey.

Comprehensive data on this subject was last collected by NSSO in its 58th round (July - December 2002). the present report provides key indicators from the 58th round as well, for comparison.

Some important findings of the survey are given below.

- About 49 thousand slums were estimated to be in existence in urban India in 2008-09, 24% of them were located along *nallahs* and drains and 12% along railway lines.
- About 57% of slums were built on public land, owned mostly by local bodies, state government, etc.
- In 64% of notified slums, a majority of the dwellings were pucca, the corresponding percentage for the non-notified ones being 50%.
- For 95% slums, the major source of drinking water was either tapped or tube wells.
- Only 1% notified and 7% non-notified slums did not have electricity connection.
- About 78% of notified slums and 57% of the non-notified slums had a pucca road inside the slum.
- About 73% notified and 58% non-notified slums had a motor able approach road.

- About 48% of the slums were usually affected by water logging during monsoon – 32% with inside of slum waterlogged as well as approach road to the slum, 7% where the slum was waterlogged but not the approach road, and 9% where only the approach road was waterlogged in the monsoon.
- The sanitary conditions in the slums in terms of latrine facility during 2008-09 showed considerable improvement since 2002. Latrines with septic tanks (or similar facility) were available in 68% notified and 47% non-notified slums (up from 66% and 35% respectively in 2002). At the other extreme, 10% notified and 20% non-notified slums (down from 17% and 51% in 2002) did not have any latrine facility at all.
- About 10% notified and 23% non-notified slums did not have any drainage facility. The corresponding proportions in 2002 had been 15% for notified and 44% for non-notified slums. Underground drainage systems or drainage systems constructed of pucca materials existed in about 39% notified slums (25% in 2002) and 24% non-notified slums (13% in 2002).
- Underground sewerage existed in about 33% notified slums (30% in 2002) and 19% non-notified slums (15% in 2002).
- Government agencies were collecting garbage from 75% notified and 55% non-notified slums.
- Among these slums, garbage was collected at least once in 7 days in 93% notified and 92% non-notified slums. About 10% notified and 23% non-notified slums did not have any regular mechanism for garbage disposal.
- Over the last five years, facilities had improved in about 50% of notified slums in terms of roads (both within-slum road and approach road) and water supply. The incidence of deterioration of any of the existing facilities in notified slums during the last five years was quite low (about 6% or below).
- In case of most slum facilities – sewerage and medical facilities being exceptions – the facility was reported to have improved during the last five years in more than 20% of non-notified slums. Deterioration of any of the existing facilities in non-notified slums, like notified slums, was rare (about 9% or below).
- Facilities such as street light, latrine, drainage, sewerage and medical facilities were each reported by more than 10% of notified slums to be non-existent both at the time of survey and five years earlier. In case of non-notified slums, facilities like street light, latrine, drainage, and sewerage and garbage disposal were each reported by more than 20% of the slums to be non-existent, both during the survey and five years earlier. Where improvement had been brought about during the last 5 years, it was due to the

- Government's efforts in about 80-90% of slums, both notified as well as non-notified and for all the facilities. Improvement in educational facilities at primary level was attributed to NGOs in 13% of the notified slums where such improvement was reported. NGOs were also found to have played a role in the improvement of latrine and sewerage system in non-notified slums.

Topographical survey and GIS mapping

The preparation of base map of Wood Industries slum has been prepared with Global Positioning Stations (GPS) and temporary Benchmarks (TBM) for Dereferencing and accurately locating the slum. These points have been selected and located at well defined locations on the ground after discussion with the ULB officials. The existing topographical features have been represented to the actual terrestrial position.

Based on the Total Station survey and Socio-economic survey GIS based thematic maps were generated. This helped in accurate representation of the ground scenario with that of the socio-economic conditions of the people. The following GIS maps were generated for inclusive planning:

Outcome

Water is a basic requirement of life. Absence of adequate water is a major issue for health as well as comfort for the poor. With the implementation of the project, the slum dwellers will have access to safe drinking water, which will greatly help their personal health, and hygiene. Quality of life would improve significantly and the multiplier effect due to this investment would reap significant benefit to the economy of this region within a considerable short period of time.

Water supply includes sources of supply, features of collection and distribution system, water demand and availability, quality of surface and groundwater source, reuse and recycling of water including conservation of water at the household level. The endeavour for all the proposals is to optimize the total cost of the system.

Situation Appraisal & Key Intervention for Identified Slum

Presently accessibility to water supply facilities in the slum pocket is inadequate. The major source of water is from the common tap water available in the slums. The slum is partially connected to the municipal water supply main.

It is now proposed that water pipeline shall be provided in each household with requisite number of

Taps, as computed during the survey as felt needs shall be provided under this Project. However, considering that the houses are being provided with water, the provisions of multiple taps have not been encouraged and kept to the minimal level.

Assessment Overall State of Infrastructure

One of the priority area identified for Wood Industries slum has been absence of adequate drainage. Most of the drainage is kutchha and inadequate for covering the slums which had led to water logging which in turn affected the environment and health of the people on an overall basis.

As mentioned above poor drainage system and consequently chronic water logging are the major issues of concern. There is hardly any pucca drain. The state of drain also affects the condition of the road.

Though there are storm water drains on the main road around the slums, but there is no systematic connection with the internal areas of the slum, thereby leading to acute water logging within the slum. It is worth mentioning that apart from lack of drainage network in several slum pockets, major challenge lies with its maintenance. In numerous cases drains in slums gets choked due to improper disposing of solid waste and other hazardous materials into the existing drains.

Situation gets beyond control particularly during monsoon season like July and August. Accumulated water causes to generate public health problems. Haphazard growth and settlement in the slum area has blocked the natural drainage courses, which in turn causes water logging and stagnation in different parts of the slum.

Proposed Interventions

It is thus proposed to have an integrated drainage programme covering the slum pocket. The programme shall envisage construction of pucca drain throughout the road length and installing a maintenance programme to ensure that the drains are kept free from clogging from plastics and other materials. Depending on the availability of space and requirement, a sections have been designed, Designs of which have been provided in the relevant sections.

Road Infrastructure

Proposal Rationale

A key component of the Proposal is a focused initiative to provide strong connectivity and provision of movement in the slums. This will enable the poor people to benefit from greater mobility and would increase their employment opportunities, open up trading and marketing of products, and important improve access to health, education, and other social services.

Roads in the slum are highly undeveloped and ill maintained. Poor roads are strong barrier to the development of the slums. Poor road condition and absence of road facility in several slums makes life difficult for all slum dwellers, especially, women and children. It also hampers prompt movement of sick; particularly those who require urgent medical attention. Lack of maintenance, coupled with poor drainage makes life even worse during monsoon season. Road are rarely re-built or re-paired periodically due to several reason. Provision of basic quality road is thus an important element of slum development. The existing road network system of the slum has become inadequate to cope up with the present and ever increasing needs. In order to bear the additional pressure due to enhanced civic, economic and commercial activities of the slum, existing road network system in several places are required either to be up-graded or winded and new roads are also be constructed in a number of places where the network is inadequate.

Proposed status and strategy

The existing condition of the road is poor and cause great hardship to the slum dwellers particularly women and children. The existing roads in the slum areas are predominantly made of brick pavement. These roads are substantially worn out. The lane roads are Kutchha roads. These roads are highly vulnerable and are in a poor condition particularly in rainy season

One of the major issues is absence of proper maintenance. In view of this it is proposed that the entire road network is to be converted to concrete pavement as concrete pavements are durable and easy to maintain.

The Road needs to be maintained. It is proposed that operation and maintenance and servicing of these roads be done by the Municipality. The Bustee Working Committee shall be the first level of responsibility for ensuring that the pipelines etc. are kept in good order. The project cell of the

Municipal Corporation shall carry out the overall operation and maintenance.

Proposed Intervention

All the proposed roads are rigid pavement-cement concrete roads. Rigid pavements are those which possess noteworthy flexural strength. The concrete pavement slab can very well serve as a wearing surface as well as effective base course. Therefore usually rigid pavement structure consists of a cement concrete slab, below which a granular base or sub base course may be provided. Rigid pavements are generally designed and the stresses are analyzed using elastic theory, assuming pavement as an elastic plate resting over elastic or a viscous foundation.

Outcome

After successful implementation of the scheme the slum dwellers will have facilities like pre-school education, adult education, non-formal education and social, recreational activities in the slum area. The community centres would provide the people to gather in, to meet and discuss their problems. It is not just a physical location but a space; where poor people could own, develop their thoughts and also could contribute their own skill and labour to make their dream come true. It will also provide the Municipal Corporation in networking with the urban poor communities in order to exchange information and views.

Proposed Intervention

In view of the above, it is proposed that a Community Centre is established to cater the slum population. For community development a community centre is proposed. The one storied community centre has total plinth area of 223.4 sq m. There will be multipurpose hall which may be used as skill development centres or livelihood centre, health centres and Crèche are provided. The Community Centres act mainly as a supporting unit for livelihood and for revenue generation for O&M.

Definition of Slum for Housing

Different definitions of a slum exist in different statutes and in urban poverty literature. For the purpose of HOUSING SCHEME, it is proposed to adopt the definition given in the 2001 Census, which is as follows:

- a. All areas notified as 'Slum' by State/Local Government and UT Administration under any Act;

b. All areas recognized as 'Slum' by State/Local Government and UT Administration, which have not been formally notified as slum under any Act;

'Slum' or 'Slum Area' – is a compact settlement of at least 20 households (For NE & Special Category States it is 10-15 households) with a collection of poorly built tenements, mostly of temporary nature, crowded together usually with inadequate sanitary and drinking water facilities in unhygienic conditions.

Situation Appraisal

The people living in the slums mostly have kutchha (301) and semi-pucca (99) housing. In certain cases where pucca housing is available, they are usually in dilapidated condition. The kutchha houses are in very poor condition and require extensive repairs. Most of the houses have tiles on roof. While during the survey some of the houses have been noted to be in average condition, the quality of these houses is also speedily deteriorating.

Proposed Intervention

In line with the vision to 'housing for all', an integrated housing programme is proposed to be implemented. The target will be all the slum dwellers in the pocket. In situ single dwelling units are proposed.

Table-36: Dwelling units

Building type	Number of DU
In situ single Unit	400 within 37 slums & non slum

Building Plan

The buildings are proposed to cover an area of approximate 32 Sq.mt along with provision of 2 rooms, kitchen and sanitation facility. The layout, size and type design of housing dwelling units depends on the local conditions and the preferences of the beneficiary. The houses, has been designed in accordance with the desire of the beneficiaries, keeping in view the climatic conditions and the need to provide ample space, kitchen, ventilation, sanitary facilities, etc. and the community perceptions, preferences and cultural attitudes.

In line with the scheme, carpet area of the house will be not less than 25 sq. mts and preferably two room accommodation plus kitchen and toilet should be constructed.

Identification of Beneficiaries

Khirpai Municipality in consultation with State Urban Development Agency (SUDA) will approve the phasing of the beneficiaries in the region. The beneficiaries so identified and the projects so prepared shall be done in consultation with the committees and community development societies already existing in that particular city. The identification of beneficiaries will be on the basis of the baseline survey already conducted under PMAY Demand Survey.

Allotment of Houses

Allotment of dwelling units will be in the name of the female member of the household. Alternatively, it can be allotted in the name of husband and wife jointly. Ownership of land required for every Beneficiary.

Town Planning Norms

Up-gradation of existing constructions and construction of new houses shall only be taken after approval of the lay out by the urban local body. Respective State Govts. May relax some town planning norms for sanction of such layout Plans, to facilitate HOUSING SCHEME, however, minimum acceptable standards of Town Planning will need to be set and followed. All planning are done as per UDPFI & CPHEEO guidelines and local Municipal Bye-laws.

Tenure

Unlike rural areas, land is scarce in urban areas particularly in large metropolises. Under HOUSING SCHEME, the responsibility for providing land for the project rests with the State Government or its agencies.

Summary of Investment

Project Costing

The costing for the individual sectors has been made on the basis of applicable Schedule of Rates. The details of each of the sub-projects have been provided in the respective sections.

The cost components include:

Infrastructure: Cost of infrastructure development/up-gradation including water supply, sewerage, storm water drainage, solid waste management, roads & drainage, street lights, etc.

Housing: Construction Costs would need to be arrived from the various components that are proposed to be implemented and would vary depending on the development option identified.

GOI Contribution:

PMAY scheme guidelines stipulate that, 1.5 lakhs of the unit cost of dwelling unit. The Central share would be available as per milestones set out in Memorandum of Agreement (MoA).

Beneficiary Contribution:

In order to ensure beneficiaries interest, financial contribution by the beneficiaries is critical. The share of beneficiary contribution in housing is proposed to be a minimum of 25000/-. As per PMAY guidelines no contribution from the beneficiaries is expected in infrastructure improvements

State Contribution:

The decision would be left to the remaining share would have to be arranged by the State. State will contribute 5% of total Dwelling cost for infrastructure.

ULB Contribution:

ULB have no contribution on dwelling unit cost. ULB will contribute 5% of total Dwelling cost for infrastructure.

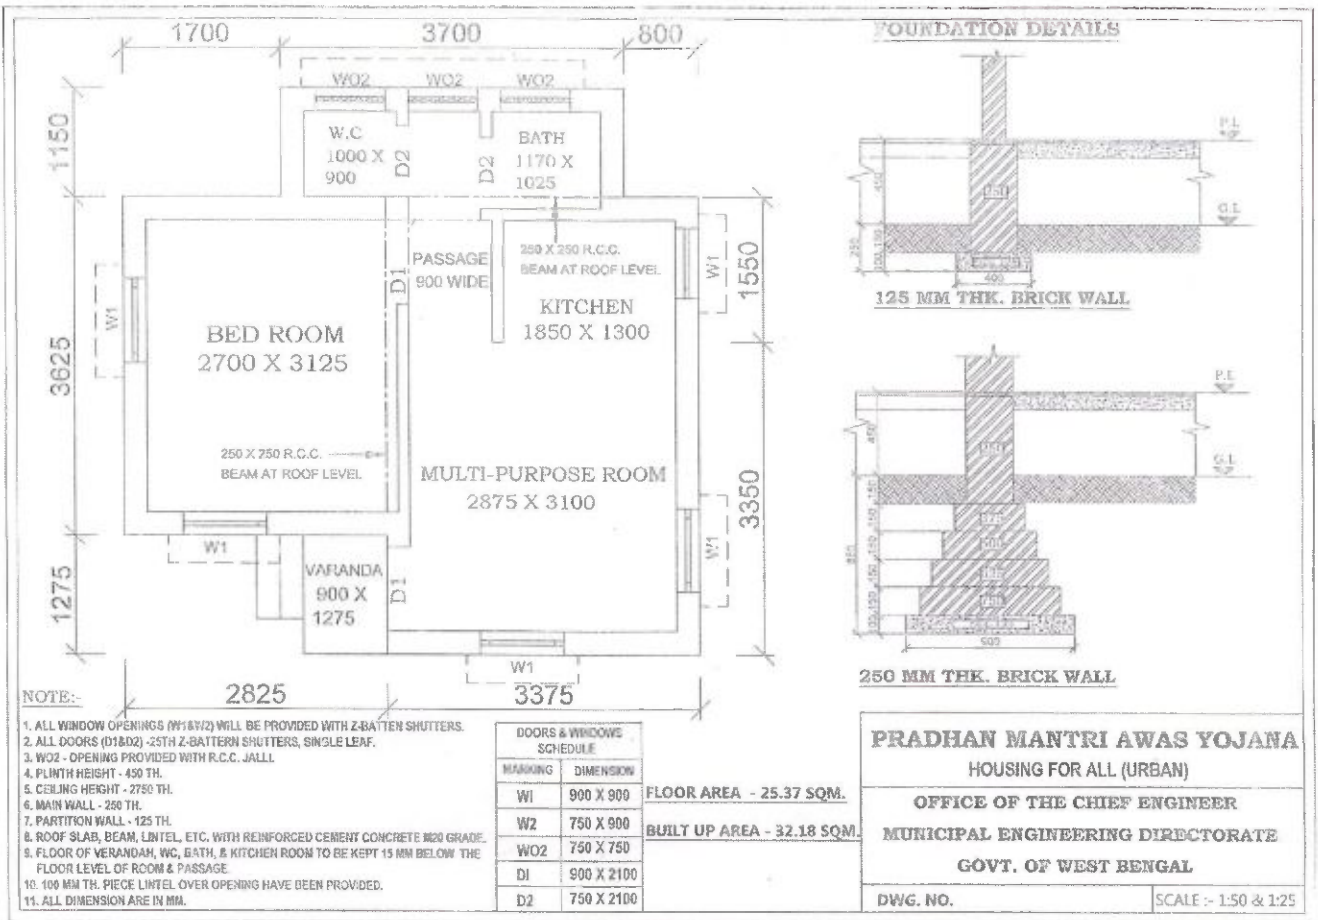

In the 1st Meeting of SLSMC of West Bengal it has been decided that the flowing funding pattern should be adopted for implementation of PMAY until further revision.

Table-37: Share of Fund

Type of City/Towns as per 2011 census	Component	Contribution of			
		Central Rs.(Lakhs)	State Rs.(Lakhs)	ULB Rs.(Lakhs)	Beneficiaries Rs.(Lakhs)
Total cost of Beneficiary LED Construction	Housing	1.5	1.93	Nil	0.25
	Infrastructure	Nil	5 %	5 %	Nil

4.2. Disaster Management and Mitigation

Most of the citizens admit the necessity of elimination of hazards arising out of collapse of ill maintained buildings of temporary nature during periods of heavy rains and storms and immediate renovation of drainage system by construction of drains of adequate size and re-sectioning of the two channels namely Gangur Canal and DVC Canal for increasing their carrying capacities by following appropriate design for the same. The structural design of the building is made by the MED, Govt. of West Bengal considering the norms of disaster management.

4.3. Statutory approval including environmental clearance (as applicable)

Table-38: Statutory approval including environmental clearance

IMPACT & REMEDIES		
1.	Utilization of alternative material Characteristics and availability of alternative material	Locally available bricks etc. will be used.
2.	Rehabilitation of water bodies & measures for maintaining surface runoff smoothly	No water body is affected by the alignment of road. The road side open C. C. / Brick masonry drains have been provided for free flow of storm water.
3.	Measures for Erosion Control	Not applicable for the slum area.
4.	Conservation of Topsoil a. Extent of loss of topsoil b. Area requirement for topsoil conservation c. Inclusion of conservation of topsoil d.	Not applicable for the slum area.
5.	Impact on Heritage & Culture a. Identification of locally significant cultural properties b. Assessment of likely impacts on each cultural property due to project implementation c. Possible measures for avoidance i) Identification of alternative routes ii) Relocation of Culture property in consultation with the local community iii) Common Property	Question does not arise.
6.	Location of Natural Habitants	It will not be disturbed
7.	Construction of site office / Camp	Temporary construction of camp / office shall be established by contractor and since the project is small and scattered, the temporary impact on environment for Construction Camp / office at the time of execution of work is negligible.
8.	Quarrying of Materials a. Sourcing of materials from quarries b. Lead from various existing quarries c. Adequacy of material for the project in these quarries	The construction materials require for the project shall be procured from : a) Stone metal : from the existing. b) Bricks : From the existing brick fields nearby the project site. c) Sand : From the nearest source.

Detail Project Report for BLC in Slum and Non-Slum under HFA of Khirpai Municipality for 2015-16 PMAY: Urban

		All the materials are sufficiently available.
9.	Water Requirement; Identification of potential sources of water	Water required for the construction of work will be available from ground water. There is no scarcity of water in the region.
10.	Location of Waste Water Disposal :	
	a. Location for disposal of waste water	The surface drain have been proposed in the slum for disposal of waste water.
	b. Outfalls locations for longitudinal drains	
	i) Outfall level and back flow	Natural slope of the ground will be maintained for waterways for discharge of surface runoff. No possibility of back flow except in the case of heavy flood.
	ii) The outfall is in natural stream; measures shall be taken to prevent sediment into the stream.	The storm water drain of the slums will discharge the water to the main high drain of the town.
11.	Air Pollution during construction work	Work shall be carried out by equipments like concrete mixer machine vibrator etc. at this time of concerting work only for which air pollution will be negligible.
12.	Identify locations susceptible to induced development	Locations vulnerable to induced development: In such location the Municipality has committed not to allow building construction activity. a. Lands within 50 m of junctions b. Agricultural lands with enforce restriction on building activity on either side of road. Stretches within 100m of worship places, weekly fairs and locations of community mass gatherings.
13.	Roles and responsibilities of municipality in regulating development	The municipality shall lay down restrictions on building activities along the by-pass roads : 1. Municipality will enforce restriction on building activity on either side of road. 2. Development of Residential sites outside Existing Settlement. Appropriate measure towards the removal of encroachments onto the public land to be taken.
14.	Traffic Congestion and related air & noise pollution	As the road passes through the slum area of the town and two wheelers, Three wheelers, light vehicle will move hence there will not be any traffic congestion, related air & noise pollution.
15.	Opportunity in economic activities due to ease of transportation system	The benefits due to this project are : 1. Generation of Man days 2. Improvement in Household or population sector i.e. Improvement of personal health, hygiene, socio-economic condition, education etc.

5.2. Detailed Estimates

5.2.1. Detailed Estimate of Provision of Housing

Table-40: Detailed Estimate of Provision of Housing

DETAILED ESTIMATE FOR THE CONSTRUCTION OF SINGLE UNIT DWELLING HOUSE Pradhan Mantri Awas Yojana Housing For All (Urban) Total Covered Area- 32.18 sq.m (With Electrical Works) Reference of Schedule of Rates : PWD (W.B.), Schedule of Rates Building & Sanitary w.e.f-01.07.2014 & Corrigenda (Kolkata /24 Pgs (N & S)/ Kalyani Sub Div.) Floor Area 25.37 sqm					
SL No.	Description of Works	Quantity	Unit	Rate (Rs.)	Amount (Rs.)
1	Earthwork in excavation in foundation trenches or drains, in all sorts of soil (including mixed soil but excluding laterite or sandstone) including removing spreading or stacking the spoils within a lead of 75 m as directed including trimming the sides of trenches, levelling, dressing and ramming the bottom, bailing out water etc. as required complete. a) Depth of excavation not exceeding 1500mm .	13.000	%cu.m.	12047.00	1566.11
	SOR, PWD, P-1, I -2 a				
2	Earth work in filling in foundation trenches or plinth with good earth in layers not exceeding 150 mm. including watering and ramming etc. layer by layer complete.(Payment to be made on the basis of measurement of finished quantity of work) a) With earth obtained from excavation of foundation.	11.120	%cu.m.	7831.00	870.81
	SOR, PWD, P-1, T/3 a				
3	Supplying Laying Polithin Sheets etc. SOR, PWD, P-45, T - 13	22.000	sqm	25.00	550.00
4	Cement concrete with graded Stone ballast (40 mm.) excluding shuttering.a) In ground floor and foundation.6 : 3 : 1 proportion Pakur variety SOR, PWD, Page 24 ; Item -10 a	3.500	cu.m.	5823.00	20380.50
5	25 mm. thick damp proof with cement concrete (4:2:1) (with graded stone aggregate 10 mm. Normal size) and painting the top surface with a coat of bitumen using 1.7 kg. per sq.m. including heating the bitumen and cost and carriage of all materials complete. SOR, PWD, P-45, T-12	6.810	sqm,	297.00	2022.57
6	Brick work with 1st class bricks in cement mortar (6:1)

Table-43: Cost Estimate for 2 Nos Leach Pit for single unit Dwelling Unit

Cost Estimate for 2 Nos Leach Pit for single unit Dwelling Unit P.W.D Schedule of Rates effect from 1st July 2014					
(ANNEXURE-II)					
Sl No	Description of Items	Quantity	Unit	Rate	Amount
1	Earth work in excavation of foundation trenches or drains in all sorts of soil (including mixed soil but excluding or stacking the spoils within a lead of 75 m. as directed. The item includes necessary trimming the sides of trenches leveling dressing and ramming the bottom boiling out water aqs required complete . Depth of exavation not existing 1500mm P.No-1, I-2(a)	2.500	%Cu.M	12047.00	301.18
2	Cement concrete with graded jhama Khoa ballast (30 mm size) excluding shuttering. In ground floor and foundation (a) 6:3:1 proportion.	0.050	Cu.M	5803.06	290.15
3	Brick work with 1st class bricks in cement mortar (6 :1). a) In foundation & Plinth P.no-29, I-21(a)	0.010	Cu.M	5719.00	57.19
4	125 mm. thick brick work with 1st class bricks in cement mortar (4 : 1) G.Floor P.no-31, I-29	3.000	SqM	714.00	2,142.00
5	Controlled Cement concrete with well graded stone chips (20 - mm nominal size) excluding shuttering and reinforcement with complete design of concrete as per I : 456 and relevant special publications submission of job mix formula after preliminary mlx design after testing of concrete cubes as per direction of Engineer-in charge Consumption of cement will not be less than 300 Kg of cement -with Super plasticiser per cubic meter of controlled concrete but actual consumption will be determined on- the basis of preliminary test and job mix formula. -I n ground floor and foundation. [Using concrete mixture] M 20 Grade P.no-12, I-6(a)	0.145	Cu.M	6871.54	996.37
6	Reinforcemnet for reinforced concrete work in all sorts of structures incl. Distribution bars, stirrups, binder etc. incl. supply of rods, initial straightening & removal of loose rust (if necessary), cutting to requisite length, hooking etc P.no-27, I-15(a)(i)	0.010	M.T	68508.00	685.08

Detail Project Report for BLC in Slum and Non-Slum under HFA of Khirpai Municipality for 2015-16 PMAY: Urban

7	Supplying, fitting and fixing UPVC down pipes A type and fittings conforming to IS 13592-1992 with necessary clamps nails including making holes in walls, etc. and cutting trenches in any soil, through masonry concrete structure etc. if necessary and mending good damages including jointing with jointing materials (Spun yarn, valamoid / bitumen / M. seal etc.) complete.				
	i) UPVC Pipe 110 mm dia P.no-173, I-21(A)(ii)	4.000	Mtr	291.00	1,164.00
	ii) UPVC Bend 87.5 degree 110 mm dia P.no-174, I-21(B)C(ii)	2.000	Each	162.00	324.00
8	Jaffri brick work 125 mm. thick with 1st class bricks in cement mortar (4:1) including 12 mm. thick cement plaster (4:1) in all faces in ground floor .P.no-32, I-35	2.000	SqM	792.00	1,584.00
Cost of 2 no leach pit					7,543.97
Total=					7,544.00
