

TUFANGANJ MUNICIPALITY

**DETAILS PROJECT REPORT FOR CONSTRUCTION OF 478 EWS
HOUSES UNDER BLC MODE OF PRADHAN MANTRI AWAS
YOJONA (PMAY)-HFA(U) FOR TUFANGANJ MUNICIPALITY**

2018-19

Submitted by:
Tufanganj Municipality
Dist: Cooch Behar
November, 2018

PREFACE

The Ministry of Housing Urban Poverty Alleviation, Government of India has launched Housing For All Mission (Urban)/ Pradhan Mantri Awas Yojana (PMAY) - "Housing for All by 2022" a comprehensive urban housing scheme to achieve the objective that "By the time the Nation completes 75 years of its Independence, every family will have a pucca house with water connection, toilet facilities, 24x7 electricity supply and access". The scheme seeks to address the housing requirement of urban poor including slum dwellers and will be implemented through four major components/ verticals, giving option to beneficiaries & ULBs. The four components of the

PMAY are:

- ☑ Slum rehabilitation of Slum Dwellers with participation of private developers using land as a resource
- ☑ Promotion of Affordable Housing for weaker section through credit linked subsidy
- ☑ Affordable Housing in Partnership with Public & Private sectors
- ☑ Subsidy for beneficiary-led individual house construction

The PMAY will be implemented as a Centrally Sponsored Scheme except the credit linked subsidy component, which will be implemented as a Central Sector Scheme. The scheme also prescribes certain mandatory reforms for easing up the urban land market for housing, to make adequate urban land available for affordable housing. Pradhan Mantri Awas Yojana (PMAY) envisages "Housing For All by 2022" by encouraging ULBs to tackle the problem of urban poor housing in a definitive manner. The Housing For All Plan of Action (HFAPoA) is an important instrument and the foundation for cities to attain the objective of PMAY. It is a citywide plan of action, which will provides the demand of housing by eligible beneficiaries in the ULB along with the interventions selected out of four verticals of the PMAY. For availing financial assistance under HFAM/PMAY from Central Govt. of India, the State/ULBs are required to prepare city-wise Housing For All Plan of Action (HFAPoA), Annual Implementation Plan (AIP) and Detailed Project Reports (DPRs) by carrying out certain preparatory exercise (i.e. door to door survey/collection of requisite data/information, data entry, assessment of urban poor status, devising development options for beneficiaries for verticals etc.).

Introductory Note by Chairman

It is a great pleasure and I state that the briefing short history of Tufanganj Municipality. It is a small urban town. It has 12 wards & 2.49 Sq Km in area. The population is about 20999 at present as per census 2011 [Tentative] (19310 as per census 2001).

Tufanganj Municipal town is under the administrative Jurisdiction of Cooch Behar District. The Town Tufanganj is situated at a distance of 24 Kms. East of the District town.

It is surrounded by the state of Assam in the East,
Doors

in the Northern side, Bangladesh southern part, Siliguri and Tufanganj in the western side of Tufanganj Town. In the eastern side one major river Raidak is passing through the Tufanganj Town.

The problem is one thing that the people from village towards the cities and pressure are on the Tufanganj Municipal area and the financial background is very low and it is a barrier from one part of development the municipal work at every stage. Tufanganj Municipality is an 'E' Category municipality. Here is no large, medium and small scale industry and it is very small sub-divisional town in Cooch Behar district. The municipality has the local govt. And its responsibility to increase the development work i.e. repair of road, water supply, Drainage System, Clearing of garbage, Street Light, Better Transportation System and to get better social environment to the Civic People of this town from our small capacity in every aspect. We need sufficient fund for comprehensive job to fulfilment our commitments to the citizen of Tufanganj Municipality to better civic service for our plan.

This document has depicted the basic need of the Tufanganj Municipality town as a whole and has identified various project so that prioritised implementation of the identified scheme will ultimately lead Tufanganj town towards planned development by way of accessing various Central and State govt. fund as well as utilising our own revenue in order to translate the dream of improved into reality.

We are now preparation of DPR (Details Project Report) for the year 2018-19 and our target total beneficiaries 478 for BLC total project cost is Rs. 1934.94 Lakh.

Chairman

Tufanganj Municipality

TUFANGANJ MUNICIPALITY
WARD MAP
(Not to Scale)
Area - 2.49 m²

Samit Saha
Sub-Assistant Engineer
Tufanganj Municipality

City Profile and Overview

Historical Background:

This municipality has been come to its existence in the year of 1983 (10th Feb,1983). Before this the town was controlled and administered by the Town Committee. First general election was held in 28th May 1995. Number of ward reduces sixteen to twelve in 1995 election. From the First election to present Subash Chandra Bhawal is chairman.

It has 12 wards & 2.49 Sq Km in area. The population is about 20999 at present as per census 2011 [Tentative] (19310 as per census 2001).This municipality has its all principle departments and running in a discipline manner. The people of the locality are very co-operative and friendly towards the activities of the Municipality. Tufanganj Municipal town is under the administrative Jurisdiction of Cooch Behar District. The Cooch Behar District in the State of West Bengal is situated at the extreme northeast corner of the state.

The Town Tufanganj is situated at a distance of 24 Kms. East of the District town.

Tufanganj Municipality is one of the remotest Municipalities and is the border district of Coochbehar. The area as whole is underdeveloped and is inhabited by poor people. A sizable population under this ULB lives below the poverty level. This municipality is earnestly trying to do all sorts of betterment with its poor resources.

Regional Setup:

The district geographically forms part of Himalayan Tarai of West Bengal the northern boundary and most part of eastern boundary of the District is bounded by Rongpur District of Bangladesh, and the eastern boundary is formed by the District of Dhubri of Assam.

Administrative Boundaries:

Total geographical area of the Municipality is 2.49 Sqkm. It is surrounded by the state of Assam in the East, Doors in the Northern side, Bangladesh southern part, Siliguri and Tufanganj in the western side of Tufanganj Town.. It is well connected both economically and socially with the state of Assam.

Topography and Climate:

Tufanganj is a flat terrain area with a slight south eastern slope along which the main river of the subdivision flows. The gentle slope of Tufanganj is north to east direction. Most of the land is medium land. There are neither mountain peaks nor any hills in the subdivision. Soil is clay humus. The municipality is having annual rainfall of 3736mm/annum and the temperature varies from 35oC (max) and 7oC (min)

Soil: Soil in the locality is sandy and alluvial in nature and is best for rice, Jute, vegetable production. Gravel mixed sandy soil in the large areas of river verge remain un-used decades after decades.

Transport: The sub -division town is well connected with regional cities by state bus, private vehicle and nearest Rly.station at Tufanganj Town.

Occupation: Most of the people about 15% are fully depend on agriculture that is the primary sector. Next around 65 % of the population are engaged in secondary sector followed by the remaining in the tertiary sector.

Agriculture: Jute, Rice, wheat, Cotton, Mustered seeds, are main agriculture product. Most of the land is non-irrigated and dependent on water. Infrastructural arrangement is very poor.

Industry: There is no big industry or medium size industry. In some village small and cottage industry is observed.

Socio Cultural facilities:

There are six schools with 10+2 facility – The higher education system in the town is little but resourceful. Students of these schools play stellar roles in every aspect. Also there is a college within the municipal area and one ITI has also been set-up last year. As well as there is one Polytechnic College . Apart form that one Novadaya Vidyalaya is running within the campus of Tufanganj Mahavidyalaya but in future final set-up shall be made at the Northern side of the town.

There is one sub –divisional hospital –‘Tufanganj Mahakuma Hospital’. In the year 2006-2007 to ensure the basic health services to BPL & Poor citizen Health Sub-centres under SUDA Health Project (CBPHCS) has been initiated by the ULB sharing Govt. Health service providers.

Drainage

The drainage network of the Municipality is **97 km.** in total length and is mainly of two types- Kancha and Pucca (Length of Kancha drain – 51.4 & pucca drain – 45.6km). The topography of the town helps very much in natural drainage. The major portion of the town is situated on a ridge which gradually slopes away on either side towards east and west where there are low lying areas. The soil is high permeable nature. The greater part of rain water is absorbed quickly by the ground itself and the remaining flows as surface run-off following the natural gradient. Tufanganj Municipality has constructed shallow surface drains on one side of the road which carry water and discharge the same into low lying area.

In most of the slum there is no proper drainage network system. Low open area is to be filled and drainage network within the slum is to be designed. This system is to be connected to the main drain network of the ULB. This will require extension of drainage from 500m to 1000m outside slum.

Figure IMP 1: Pie Chart showing percentage of types of drains in the municipal area

Solid Waste Management

With the advent of the age along with population pressure region are facing huge problems regarding their various Infrastructure service. In the last century up to 70's the amount of solid wastes

generated in this Municipal area were simply thrown in the vacant lands. The type of these wastes are mainly organic i.e. easily decomposable. Solid wastes collected from markets are used for dumping to fill up the low-lying areas.

But gradually with the increase in population, the quantity of generated wastes increased at an alarming rate. The use of non- biodegradable materials like plastics has multiplied the problems regarding disposal of solid wastes in the municipal area. As a result, to keep the environment healthy, from 1980, vats at different locations, dustbins, handcarts etc. came into existence.

For future there is a proposal for providing individual buckets to BPL families in slum areas. There is also proposal for door to door collection and finally dumped it to the trenching grounds. The municipality in near future shall establish a vermin-compost plant for processing of waste and proposal has been submit to MA Dept.

The future system of Solid Waste Management in general is based on the three consecutive systems of:

Sanitation

Since its inception, Tufanganj Municipality is concerned about the sanitation. Growing population demands better and modern sanitation facilities. Keeping this in view, 8 Nos. community toilets have been constructed in the Municipal area. Continuous efforts are making to improve the services further. However modernized sewerage system is in need within near future.

Health

The development objectives of health care delivery improvement plan under the different themes are as follows:

Theme 1: Public Health Services

- Exploring opportunities for strengthening decentralization and other public private partnerships in public health services
- Strengthening and development of Health Management Information System.
- Better co-ordination with State Government Hospitals and Sub-center for maintaining a better referral system
- Improve the asset and human resource utilization pattern of health services such as ambulance services

Theme 2: Reproductive and Child Health Care Services

- To establish quality antenatal care and institutional delivery to 100% women in Tufanganj Municipality.
- To ensure 100% immunization of infants against six killer diseases within 12 months of birth.
- Improve the package of health services for both APL and BPL population.

- To spread health awareness through various methods of communication not only to the beneficiaries of the Programme but also to the excluded groups and areas within the wards
- To ensure greater coverage of the services already provided from the Health Sub Centers.
- To introduce Health Management Information System and modern networking among the different health units
- Introduction of effective school health programme
- To ensure access to emergency services for all
- Better implementation of different national programme.

Education

Theme 1: Primary Education

- To ensure the demand for pre-primary, primary non-formal educational facilities.
- To upgrade the education quality provided in the Primary school with respect to student performance and teaching quality.
- Identification of the dropout and make them return to the school.
- Improvement of the status of infrastructure and basic services in primary schools within Municipal area.

Theme 2: Literacy

- Achieving higher enrolment of children in age group of 6-14 in the SSK centers and ensuring higher utilization.
- To ensure access for specific categories of children such as the girl child, minority community children, and physical and mental challenged children.
- To bring all the aged persons who have not gone under conventional education system in the Continuing Education Centers (CECs).
- Creating awareness in the community through the existing community structures (NHG, NHC, CDS members) on the importance of primary and adult education.⁶

Population and development are intrinsically interrelated and progress in any component can catalyze improvement in others. In recognition of this awareness the CDP seeks to integrate the population perspective with all development policies to be undertaken in the plan. The population statistics is provided below:

Table 1: Population of Tufanganj

Sl. No.	Item	Tufanganj
1	Total population (Census 2011)	20999
2	Decadal Growth (Census 2011) (%)	8.75
3	Density	8433

Source: Census of India, 2011

The combination of high population growth and density, poverty, and limited resources makes the developing urban areas distinctive as in the case of Tufanganj. This population will not only require additional area for settlement to keep the density in check but also increasing infrastructural facilities to

lead a minimum standard of life. The population projection is important because the services and facilities provided by the municipality ought to increase at the same ratio as the population growth. The projected population in the next 5 to 10 year should have the infrastructure and the economic stability and social standing for a good and healthy life. Thus a systematic development of the basic infrastructure is the need of the day.

Table 2: Projected Population Tufanganj

1.4. Housing and Physical Infrastructure profile

Housing profile

48.36% of the households live in a house/hut with only one room in the district of Tufanganj Municipal area. In context of Tufanganj, 29.22% of households live in semi- pucca or partially pucca houses. Housing condition in its slums is not in good shape as 47.32% houses live in Katcha house. Considering the above, municipality has already initiated construction of beneficiary led houses in 54 slums spread over 12 wards on a piecemeal basis leveraging ISHDP scheme in a phased manner. In the First phase (2008-2012) total 308 houses were constructed in 50 slums spread over 12 wards. Infrastructure projects like Road, Drain and pipeline work were also completed.

Table 4: Number of Housing proposals under different projects

Ward No	Housing Under IHSDP	HUP	Total
1	18	2	20

Land Use

Land is one of the most important scarce natural resources. The importance of land use planning, therefore, plays a vital role due to large population growth day by day.

Table below shows Land use distribution of Tufanganj.

Table 5: Land Use pattern in Tufanganj

Land Categories	Area in Sq. Km	% of the Total area
Residential	1.518	61%
Commercial	0.211	8.5%
Others	0.143	5.75%
Total Area	1.872	

Table 6: Other Land categories

Land Categories	Area in Sq. Km	% of the Total area
Transport area	0.093	3.75%
Agriculture	0.373	15%
Water body	0.131	5.27%
Total Area	0.597	

Housing Typologies

As on September 2015, the population of Tufanganj was 23623 of which number of persons residing in slums are 10157, which is about 48.36% of the total population. As per the USHA total household in 54 slums are 2635 and as per demand survey for housing for all by 2022 undertaken as part of preparation of HFAPoA and validated by ULB and community, 1205 household living in semi pucca house and 1285 household living in kuchha house. On the other hand 231 household are living in non- slum area having semi pucca and katcha house. Out of 231 household 104 household are living in Katcha House and 127 household are living in Semi-Pucca House. From present Demand Assessment survey for Housing for all (HFA), it is noticed that 2721 household covering under this project. Out of these 2721 houses, 2690 houses will be constructed through "Beneficiary-led-Construction" and 31 houses will be constructed through "Credit to Link Subsidy". Under "Beneficiary-led-Construction" each beneficiary will get 1.5 lakh from central assistance.

Physical Infrastructure profile

Water Supply

Present status of Demand & supply:

The population of Tufanganj Municipality according to 2001 census was 19310. Based on Socio-economic & Caste Census 2011 the tentative population of Tufanganj Municipality is 20999. This has been estimated to rise to 24697 in 2021 and will be around 29047 in the year 2031. The water demand according to that was 0.45 MGD (2001). Accordingly the Municipal Water Supply Department has calculated the projected demand to be 1.2 MGD in the year 2021 @ of 90 lpcd. Hence the gap is 0.75 MGD taking an average supply of 70 lpcd.

Extent of Coverage:

At present, the entire population within the Municipal Area is solely dependent on Ground Water. Though augmentation of water supply is going on, all the twelve wards are expected to be covered through the piped network by the existing ongoing project.

Service levels: The total quantity of water supplied at present in Tufanganj Municipal area is approximately 70 liters per capita per day.

Existing System:

Source of Water:

This aspect mainly deals with the type of different source of water in the municipality. The necessity of this aspect is that since a development plan is for a plan period of five years, and is for the resident's of the area, the planning needs to be done accordingly for the people of the area.

Table 7: Status of Water Supply service levels benchmark

Sl.No.	Indicators	Present status	MOUD Benchmark
1	Coverage of water supply connections	85%	100%
2	Per capita supply of water	90 LPCD	135 LPCD
3	Extent of metering of water connections	0 %	100%
4	Extent of non-revenue water	90%	20%
5	Quality of water supplied	100%	100%
6	Cost recovery in water supply services	10%	100%
7	Efficiency in collection of water supply related charges	10%	90%

Drainage and Sanitation

The drainage network of the Municipality is **97 km.** in total length and is mainly of two types- Kancha and Pucca (Length of Kancha drain – 51.4 & pucca drain – 45.6km). The topography of the town helps very much in natural drainage. The major portion of the town is situated on a ridge which gradually slopes away on either side towards east and west where there are low lying areas. The soil is high permeable nature. The greater part of rain water is absorbed quickly by the ground itself and the remaining flows as surface run-off following the natural gradient. Tufanganj Municipality has constructed shallow surface drains on one side of the road which carry water and discharge the same into low lying area

Present status: At present there is no underground sewerage system in Tufanganj Municipal area. The type of latrines used here are mainly of three types

- Septic Tank: Generally the middle class people of the Municipal area using this type of system. Approximately 70% to 75% of household are covered under this system.
- Two Pits pour Flash Latrine: These are the new system of sanitation, which has replaced insanitary privies in slum areas. The RAY and allied schemes for these latrines have not only

uplifted the sanitation standard of the slum dwellers but has also succeeded partially to generate awareness regarding sanitation among the people. 20% to 15 % of households are covered under this type of sanitation system.

➤ In sanitary privies: These are actually unhygienic sanitation system and are used mainly by the EWS. About 2% to 3 % of households covered under it.

The sanitation system of the town is poor. The table below presents a service level standard of Tufanganj in terms of coverage of the city with respect to sanitation and sewerage.

Community toilet	-	8 nos.
Pay & Use public toilet	-	10 nos.
Types of sanitary in the municipal area		
▪ Septic Tank with soak pit	-	85%
▪ Septic Tank without soak pit	-	15%
▪ Kuncha Latrine	-	Nil

Table 11: Benchmarks: Sewerage and Sanitation in Tufanganj as on 2011

Sewerage & Sanitation Services	Benchmark	National Average	Current Service Level Benchmarks in Tufanganj
Toilet Coverage	100%	85.8	100%
Sewerage network coverage	100%	48.5	0%
Waste water collection efficiency	100%	41.9	0%
Wastewater treatment adequacy	100%	48.8	0%
Quality of wastewater treatment	100%	58.8	0%
Extent of reuse & recycling of treated MSW	20%	6.8	0%
Cost recovery - waste water	100%	38.3	0%
Collection efficiency	90%	42.5	0%
Complaints redressal	80%	76.4	0%

Source: MoUD, GoI and Tufanganj Municipality

Above table clearly shows though toilet coverage of the town is reasonably good, but lot of interventions are required to improve sanitation and there is no household level drainage facility leading to unhygienic environment in slums.

Solid Waste Management

With the advent of the age along with population pressure region are facing huge problems regarding their various Infrastructure service. In the last century up to 70's the amount of solid wastes generated in this Municipal area were simply thrown in the vacant lands. The type of these wastes are mainly organic i.e. easily decomposable. Solid wastes collected from markets are used for dumping to fill up the low-lying areas.

But gradually with the increase in population, the quantity of generated wastes increased at an alarming rate. The use of non- biodegradable materials like plastics has multiplied the problems regarding disposal of solid wastes in the municipal area. As a result, to keep the environment healthy, from 1980, vats at different locations, dustbins, handcarts etc. came into existence

2) Hydrolic Trolly	3 Nos
3) Tricycle Van	17Nos.
6) Buckets	7 Nos

Road Coverage and Condition

- The Tufanganj Municipal area is well linked to different cities of Coochbehar and part of Tufanganj district. Besides, the Area is also connected to these areas by national highways. The NH31 is passing through the southern part of the Municipal area has enhanced the connectivity to the nearest towns of the district and the state.
- **City level road network:** The Tufanganj Municipal Area has approximately 63% roads, which is much less than any small sized town. With the rapid growth of Urbanization of the Coochbehar region, the population of Tufanganj Municipal Area is increasing day-by-day. In coming future, the percentage of present roads will not be able to cope up with increasing population.

1.5. Assessment of Present Status of Slums

With an objective to formulate appropriate Slum Development Model for each of the slums, availability of latest and reliable baseline data on all the slums is instrumental. This baseline data encompassing indicators including socio-economic, geographical/spatial, physical etc. shall help develop an overall portrait of the slums in Tufanganj. This shall help in identifying development need for slums and formulating slum specific development strategies.

As on September 2015, the population of Tufanganj was 23623 of which number of persons residing in slums are 10157, which is about 48.36% of the total population. As per the USHA total household in 54 slums are 2635 and as per demand survey for housing for all by 2022 undertaken as part of preparation of HFAPoA and validated by ULB and community, 1205 household living in semi pucca house and 1285 household living in kuchha house. On the other hand 231 household are living in non- slum area having semi pucca and katcha house. Out of 231 household 104 household are living in Katcha House and 127 household are living in Semi-Pucca House. From present Demand Assessment survey for Housing for all (HFA), it is noticed that 2721 household covering under this project. Out of these 2721 houses, 2690

houses will be constructed through “Beneficiary-led-Construction” and 31 houses will be constructed through “Credit to Link Subsidy”. Under “Beneficiary-led-Construction” each beneficiary will get 1.5 lakh from central assistance.

Ward wise slum population and number of households are presented in the table below:

Table 12: Ward wise slum population in Tufanganj

Ward No.	No. of Slums in Ward	No. of HHs in slum	Total Population	% of total Population		Male Population	Female Population
				Slum	Tufanganj		
1	6	199	745	7%	4%	385	360
2	5	231	900	9%	4%	460	440
3	4	223	854	8%	4%	430	424

Total	54	2635	10157	100%	48%	5160	4997

Source: USHA survey-2015

Maximum concentration of population has been observed in ward no. 5 and 12 with their share of slum population to total recording around 11% and 14% respectively, rest of the ward the slum population about 7% in respect of total slum population.

There is no gender imbalance in terms of population of male and female in slums of Tufanganj recording almost 1:1 ratio.

Table below represents ward wise distribution of all the slums along with their ownership status, and age.

Source: USHA Survey and MIS data validation report

As can be observed

- ❖ Tufanganj has uneven distribution of slums in its 12 wards with 3 wards having 6 or more than 5 slums, while, in other wards, number of slums is 4 or less than .
- ❖ Out of total 54 slums, based on status, population and area is provided in Annexure B-1.
- ❖ Out of total 54 slums, 6 slums are non- notified slums.
- ❖ Average age of the slums is around 20 years.

50	10047	Collage Para Paschim Colony	Collage Para Paschim Colony	12	9645

infrastructure facilities and shelter for improving living conditions in the slums.

V. **Valmiki Ambedkar Awas Yojana (VAMBAY):** VAMBAY is a central Government scheme to provide housing to the poor. Under VAMBAY scheme, an amount of Rs. 50,000 is extended to a beneficiary in a city with more than 10 lacs population while in the cities having population less than 10 lacs. each beneficiary gets Rs. 40,000/- fifty percent of the amount is central government grant while the rest could be taken as loan from HUDCO/ other nationalized banks/ state government/ urban local bodies.

VI. **Integrated housing and slum development program (IHSDP):** IHSDP was under Jawaharlal Nehru Urban Renewal Mission (JNNURM) beginning from the year 2008-2006. The major objectives for the IHSDP program are:-

- Focussed attention to integrated development of basic services to the poor. The basic services include security of tenure at affordable price, improving housing, water supply and sanitation.
- Secure effective linkages between asset creation and asset management so that the basic services to the urban poor created in the cities, are not only maintained efficiently but also become self sustaining over time.

HFAPoA and Proadhan Mantri Awas Yojana (Housing for All)

To give pucca house for every family is currently on the global agenda. One of the Millennium Development Goals (MDGs) is to 'achieve significant improvement in the lives of slum dwellers, by 2022 . Similar goals are set forth by Pradhan Mantri Awas Yojana in 2022, to create pucca house for every family.

ULB undertake a demand survey through suitable means for assessing the actual demand of housing. While validating demand survey, Cities should consider possible temporary migration from rural areas to the city just to take advantage of housing scheme and exclude such migrants from list of beneficiaries. On the basis of demand survey and other available data, cities prepare Housing for All Plan of Action (HFAPoA). HFAPoA should contain the demand of housing by eligible beneficiaries in the city along with the interventions selected out of four verticals. The information regarding beneficiaries is collected by ULB in suitable. While preparing HFAPoA, ULB and Implementing Agencies should also consider the affordable housing stock already available in the city as Census data suggests that large number of houses are vacant.

0-10% █ 10-20% █ 20-30% █ 30-40% █ 40-50% █ 50-60% █ 60-70% █ 70-80% █ 80-90% █ 90-100%

Urban Population Living in Slums and the Indian Scenario (source: UN-HABITAT)

preparing HFAPoA

Cities which have already prepared Slum Free City Plan of Action (SFCPOA) or any other housing plan with data on housing, utilise the existing plan and data for preparing "Housing for All Plan of Action" (HFAPoA). Houses constructed under various schemes should be accounted for while

finalising the plans and beneficiary list.

representatives including MLAs and MPs of that area so that their views are adequately factored in while Government. The result of demand survey, draft HFAPoA and draft AIP is discussed with the local and AIPs is prepared at sub-city (ward/zone etc.) level with the approval of concerned State/UT dividing the task upto 2022 in view of the availability of resources and priority. For larger cities, HFAPoA On the basis of HFAPoA, States/Cities subsequently prepare the Annual Implementation Plans (AIPs)

the projects and approval of projects.

family. Beneficiaries is validated by ULBs thereby ensuring their eligibility at the time of preparation of district will be integrated in the data base of HFAPoA for avoiding duplication of benefit to one individual intended beneficiaries or a certificate of house ownership from Revenue Authority of beneficiary's native Bank account number and Aadhaar number/Voter ID card/any other unique identification details of

- The preparation of HFAPoA will broadly involve Slum Development/Rehabilitation Plans based on
- a. Survey of all slums – notified and non-notified;
 - b. Mapping of slums using the state-of-art technology;
 - c. Integration of geo-spatial and socio-economic data; and
 - d. Identification of development model proposed for each slum.
1. Base maps to an appropriate scale would be a pre-requisite for the preparation of Slum Development Plan/Slum-free City Plan. States/UTs may need to proceed in the following steps for the preparation of Slum-free City Plans.
 2. Securing CARTOSAT II/latest satellite images from NRSC/ISRO and preparation of base maps for the whole city and its fringes using the images;
 3. Identification and inventory of all slum clusters of all descriptions in the urban agglomeration with the help of satellite image and other available data;
 4. Inventory of all possible vacant lands in each zone of the urban agglomeration that could be used for slum development/rehabilitation development purposes;
 5. Development of Slum Map of every slum within the city and its fringes using GIS with CARTOSAT II images, ground level spatial data collected through total station survey, collating spatial information with respect to plot boundaries, network of basic infrastructure like roads, sewerage, storm drainage and water lines, etc and superimposing this on the satellite image and importing them into GIS platform as the first step towards the preparation of Slum Development Plans and Slum Free City Plan.
 6. This may be undertaken with the help of technical partners of NRSC/ISRO/other technical institutions/agency.
 7. Identification and engagement of Lead NGO/CBO to guide and anchor community mobilization for the purpose of slum survey, (May be more than one NGO/CBO in different slum zones) of the city. These Lead NGOs/CBOs should also be associated in slum survey operations and dialogues for preparation of slum level development plans;
 8. Conduct of Slum Survey based on the detailed formats (with or without changes) prepared by the Ministry of Housing & Urban Poverty Alleviation with the help of National Buildings Organization (NBO) - after due training of trainers, training of survey personnel/canvassers and canvassing. It

- would be helpful for community mobilization to pick as many canvassers from the sourced slum or nearby slum pockets;
9. Collection of bio-metric identification data of slum dwellers based on the above survey (subject to guidelines issued by Unique Identity Authority of India (UIDAI));
10. Entry of data from Slum Surveys in the web-enabled MIS application (to be provided by Ministry of HUPA), compilation and collation of data, preparation of Slum-wise, City and State Slum Survey Database and Baseline Reports. The MIS will assist in developing a robust Slum and Slum Households Information System. (Guidelines and software for development of the MIS will be issued by the Ministry of HUPA);
11. Integration of Slum MIS with GIS Maps to enable the preparation of GIS-enabled Slum Information System that is to be used for the preparation of meaningful Slum.
12. Development Plans and Slum-free City Plan using a city-wide/zone-based approach.(Guidelines and software for development of GIS platform and its integration with the MIS will be issued by the Ministry of HUPA);
13. Preparation of Slum-free City Plan should be based on the development plans for all slums and urban poor. The Plan should contain timeline of activities for achieving slum-free city, phasing strategies for the prevention of future slums, including reservation of land and housing for the urban poor. The Plan should contain timeline of activities for achieving slum-free city, phasing information and financial estimates against each of the activities
- Introduction to Pradhan Mantri Awas Yojana (PMAY)**
- Pradhan Mantri Awas Yojana (PMAY), a path breaking scheme for the slum dwellers and urban poor envisages a 'Pucca house to every family' through encouraging States to tackle the problem of slums in a holistic manner. It calls for a multi-pronged approach focusing on:
- Bringing existing slums within the formal system and enabling them to avail of the same level of basic amenities as the rest of the town.
 - Redressing the failures of the formal system that lie behind the creation of slums.
 - Tackling the shortages of urban land and housing that keep shelter out of reach of the urban poor and force them to resort to extra-legal solutions in a bid to retain their sources of livelihood and employment.
 - Enactment of a set of reforms at the state and city level related to inclusive planning, regulation

- New models of public-private partnerships whereby the private sector can be encouraged to take up affordable housing for the EWS/LIG
- Creation of fresh rental housing stock and transit shelters

Projects with strong community participation i.e. Slum upgradation/redevelopment projects initiated/spearheaded by the community; or with their demonstrable involvement and participation in design, planning and implementation

Such innovation could encompass:

The projects are needed to fully understand and develop redevelopment models that can be replicated in the city with benefits. One of the key objectives of developing The Projects is to incentivize innovation and encourage new approaches and solutions that can demonstrably improve the quality and quantity of shelter and services for the poor.

Need for Projects

1. Water connection
2. Toilet facilities
3. 24 x 7 Electric facilities
4. Roads

Projects pertaining to the following will not be considered for support under PMAY:

either in his/her name or in the name of any member of his/her family in any part of India to be eligible to receive central assistance under the mission. EWS households are defined as households having an annual income up to Rs.3,00,000 (Rupees Three Lakhs). States/UTs shall have the flexibility to redefine the annual income criteria as per local conditions in consultation with the Centre.

The beneficiary family should not own a pucca house (an all weather dwelling unit)
A EWS beneficiary family will comprise husband, wife and unmarried children.

IV. Eligible Components of the PMAY:

The duration of Pradhan Mantri Awas Yojana [PMAY] 2015 TO 2022

slum communities.

- An integrated approach covering shelter, services and livelihoods for poor

and financing, which would ensure that adequate fresh housing stock and services get created on an ongoing basis to address both current and future needs of cities.

The Nodal Department for West Bengal is Municipal Affairs Dept. (M.A. Department), Government of West Bengal. The state level Nodal Agency is State Urban Development Agency (SUDA) under M.A. Department. State Urban Development Agency was set up in 1991 with a view to ensuring proper implementation and monitoring of the centrally assisted programmes for generating employment

The Nodal Ministry and National Mission Directorate is Ministry of Housing & Urban Poverty Alleviation, Government of India.

State PMAY Mission Director

- Encouraging Public Private Partnership by having pay and use toilets and educate the slum dwellers for keeping the environment clean and hygienic.
- The Creation of affordable housing stock, including rental housing with the provision of civic infrastructure and services, on ownership, rental or rental-purchase basis.
- Development/improvement/maintenance of basic services to the urban poor, including water supply, sewerage, drainage, solid waste management, approach and internal road, street lighting.
- Integrated development of all existing slums, notified or non-notified, i.e., development of infrastructure and housing in the slums/rehabilitation colonies for the slum dwellers/urban poor, including rental housing.

Objectives:- The project has been designed keeping in mind the following objectives.

- Subsidy for beneficiary-led individual house construction
- Affordable Housing in Partnership with Public & Private sectors
- Promotion of Affordable Housing for weaker section through credit linked subsidy
- Slum rehabilitation of Slum Dwellers with participation of private developers using land as a resource

programme verticals:

The mission seeks to address the housing requirement of urban poor including slum dwellers through following

Aims and Objectives Vision

- Financial innovations in delivering the city/state wide programme
- Innovative or cost effective and green building design and technologies
- Innovations in planning, demonstrating integrated livelihoods, shelter and services; or convergence

opportunities and alleviation of poverty throughout the State. SUDA is a Society registered under the West Bengal Societies Registration Act, 1961.

Funding Pattern of PMAY

Support from Central Government shall include -

- 1.5 LAKHS of total cost of dwelling unit
- State + ULB to bear the cost of infrastructure
- State share for infrastructure to be minimum 5%
- Cost of infrastructure 10 % of sum total cost of dwelling unit
- Cost of capacity building 5 % of sum total cost of dwelling unit

Approvals & Release of Funds

- Releases and approvals to be on the basis of DPRs which need to be submitted with approval of State Level Sanctioning and Monitoring Committee.

- Innovative projects to be considered for sanction even in the preparatory stage.

- Central Funds to be released in 3 installments to the State Governments/SLNA; central assistance under different components will be released to the state / UTs after the approval of CSMC and with concurrence of the integrated Financial Division of the Ministry. Central share would be released in 3 installment of 40%, 40% and 20% each.

Project Justification

For the following reasons Tufanganj Municipality selected the slums namely mentioned below as first project for preparation of DPR under HFAPoA (PMAY)

Table:- Status of Selected Slums during 2015-2016

Sl. No	Name of the Slums	Ward No-	Slum Code	Status	Land	Age in years	National High Way	Status of Houseings	Road Status	Habitat pattern
1	Saraj Mukherjee Colony	1	10001	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 2 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable Pucca	Private
2	Suradhar Colony	1	10002	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 2 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable Pucca	Private
3	Paul Para Colony	1	10003	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 2 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable Pucca	Private
4	Joyguru Colony	1	10004	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 2 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable Pucca	Private
5	Master Para Colony	1	10005	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 2 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable Pucca	Private

Sl. No.	Name of the Slums	Ward No.	Slum Code	Status	Land	Age in years	National Highway	Status of Housings	Road Status	Habitat pattern
6	Kuchiyamari Colony	1	10006	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 2 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable Pucca	Private
7	Telipara Colony	2	10007	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 1.5 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable Pucca	Private
8	B.B.D.Bag Colony	2	10008	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 1.5 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable Pucca	Private
9	Hare Krishna Colony	2	10009	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 1.5 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable Pucca	Private
10	Satyajit Roy Colony	2	10010	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 1.5 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable Pucca	Private

51	Mondal Para Uttar Colony	12	10048	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 2 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable	Private
52	Uttar Netaji Colony	12	10049	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 2 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable	Private
53	Manindra Colony	12	10055	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 2 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable	Private
54	Mandal Para Dakshin Colony	12	10056	The condition of living in the slum is unhygienic	Land belongs to the ULB	20	The National Highway is 2 kms away	Major population is living in huts, made of darma / bricks with tin sheets and asbestos/tile on roof	Majority of roads are non-motorable and few are non-motorable	Private

The environmental condition in the slums is poor. The slums lack basic civic amenities mainly drainage, thereby leading to water logging, mainly during rainy season. This has led to an unhygienic living condition in the slums. Most of the roads within slums are brick paved or kutcha road. Though there are sufficient streetlights available. Most of the population adopts unhygienic method for disposing their waste; thereby causing huge damage to health that ultimately leads to significant loss of man-days of work amongst others. Overall physical and social infrastructure is poor.

Housing Status
Houses in the slum areas are in usually temporary in nature, without a permanent roof structure. Housing is the constituent of the social infrastructure of the economy. Like the other constituents, such as the system of education and health, housing also can either reduce or enhance the disparities in the society. The total number of dwelling units in the slums are 592 of which 319 are kacha houses.

The growth of any urban area depends upon the various factors that in fact rule the growth pattern of the urban area. The growth depends upon various characteristics of an urban area. Maximum dwellers have migrated from rural areas due to lack of employment in agriculture sector as well as better livelihood opportunities in urban area. Maximum no of household had migrated from rural to urban area. Majority of the population of this slum is living for more than 20 years in this slum. Hence, dwellers are now permanently depending on 54 nos slums. This justifies as a parameter on the importance of Slum for the Beneficiary Led Construction.

Migration

Sl.No	Name of the Slums	Ward No	Area of the Slum (Sq. m.)	Age of the Slum (in Years)	Whether located in core City/Town or Fringe area	Type of Area surrounding Slum	Is the slum Notified/ Declared	Ownership of Land where Slum is located

Status of Physical Infrastructure(2015-2016)

Social infrastructure: Health, School, Community Hall, Lively Hood Centre

Physical infrastructure: Water supply, Drainage, Solid waste, Roads, Electricity.

into two aspects:

Physical Infrastructure: Infrastructure is the basic requirement of urban life and its adequacy and accessibility are two important ingredients and key contributors in the up gradation and enrichment of quality of urban life which is the primary objective of any planned development effort. These infrastructure facilities are broadly classified

Most of the dwelling units have mud flooring closely followed by cement flooring. Firewood is the major source of cooking fuel in majority of the slum household.

Details of Social Infrastructure at a glance:

the male.

It is observed that 152 of the population are illiterate. Literacy of the female population is less than that of

Literacy level

Municipality.

Majority of the household (100%) have electricity connections, the street lights are maintained by the

Electricity

Roads in front of premises			
Motorable Pucca	40%	Motorable Katcha	25%
Non Motorable	25%	Non Motorable Pucca	10%
Non Motorable Katcha			

Approach roads to the slums are motor able but roads within slum are in dilapidated condition.

Roads

At Solid Waste Management system in the slum is mainly done by the ULB. The waste which is generated is collected daily. The drains are cleared by the local people once in a week.

Solid waste

observed at many places in and around the slum.

Disposal of storm water/ Sullage disposal drain/ culverts are insufficient. Stagnant water has been observed at many places in and around the slum.

Sewerage system is not available at Tufanganj Municipality. Drainage system as available is at per-

Storm Water Drains

is poor. There are presently two water tap only.

Majority of the household uses public taps for water supply. The situation of water supply in the slum
